The Practice Of Reality:

Control Theory in the Practice of Reality Therapy Naomi Glasser, William Glasser, 1989 Dr William Glasser's bestselling theories of Reality Therapy and Control Theory are put into action in a series of fascinating case studies. Each case shows successful resolutions to help therapists learn how these treatments complement each other.

The Practice of Reality Therapy Brian Lennon, 2019-09-10 The Practice of Reality Therapy explains Reality Therapy in such a way that the reader can begin to practise the different components that make up this powerful counselling modality. The author pays attention to the process of learning to counsel and this together with the many useful exercises will be of interest to anyone engaged in counsellor training. The book contains a clear explanation of Choice Theory psychology, the theoretical foundation for Reality Therapy. This is a companion book to the author's *The Practice of Choice Theory Psychology*.

Reality Therapy: Theory & Practice Leon Lojk, Bosiljka Boba Lojk, Besides Scientific Argument of Reality Therapy written by Leon Lojk, reality therapy has never actually been presented in a broader theoretical context. In addition to deepening understanding of total behaviour or understanding of the organism as an operationally closed self-regulating system, understanding of personality, the relationship between the individual and their environment, understanding the concept of relationships in light of choice theory, the beliefs about human behaviour that underlie our actions, and understanding mental health. Theory and the Practice of Reality Therapy by Leon and Boba Lojk presents reality therapy in relation to other psychotherapeutic approaches through some similarities and differences between them. Group reality therapy was presented in a similar way. With regard to the reality therapy theory of practice, so far only structured procedural reality therapy has been available in the literature. Glasser called it the old reality therapy and advocated therapy using choice theory, which he called the new reality therapy. This is the authentic approach of the therapist who himself lives in accordance with choice theory beliefs, which requires profound changes in the understanding of human behaviour. Until now it has not been possible to find a description in the literature of how the process of new reality therapy flows, except for the author's practical presentation of working with clients. These pages present for the first time the new reality therapy theory of practice through formulation, the relationship between therapist and client, and the theory of change in reality therapy. How reality therapy looks in practice is evident from practical examples of working with clients. The offered reading is certainly welcome to participants in reality therapy training and to reality therapists, practitioners, and those who want to learn more about this approach.
