The Professional Development Of Teacher Educators:

The Professional Teacher Educator Mieke Lunenberg, Jurriën Dengerink, Fred Korthagen, 2014-04-03 This book is a review of more than twenty years of international research on teacher educators. It offers a solid overview of what is known about the professional roles, professional behaviour and professional development of teacher educators. A systematic analysis of the focus methods and data sources of 137 key publications on teacher educators make this book into an important reference work for everyone interested in the work of and research on teacher educators. There is a growing consensus that teacher educators largely determine the quality of teachers and hence the quality of education. Through this book, Lunenberg, Dengerink and Korthagen provide not only insights into the various roles of teacher educators and the complexity of their work but they also discuss building blocks for ongoing structured and in depth professional development. The authors clarify that if we wish to take being a teacher educator seriously, it is imperative that we build our understanding on research data. The book shows that although the number of studies on teacher educators is growing, the research in this field is still scattered. The authors highlight the need to create a coherent research programme on teacher educators and provide concrete suggestions for such a programme.

The Professional Development of Teacher Educators Tony Bates, Anja Swennen, Ken Jones, 2014-12-18 This book makes a significant contribution to a hitherto much neglected area. The book brings together a wide range of papers on a scale rarely seen with a geographic spread that enhances our understanding of the complex journey undertaken by those who aspire to become teachers of teachers. The authors from more than ten countries use a variety of approaches including narrative, life history, self study and empirical research to demonstrate the complexity of the transformative search by individuals to establish their professional identity as teacher educators. The book offers fundamental and thoughtful critiques of current policy practice and examples of established structures specifically supporting the professional development of teacher educators that may well have a wider applicability. Many of the authors are active and leading persons in the international fields of teacher education and of professional development. The book considers novice teacher educators' issues of transition, identity development including research identity, the facilitation and mentoring of teacher educators' self study research including collaborative writing, use of stories, professional development within the context of curriculum and structural reform. Becoming a teacher is recognised as a transformative search by individuals for their teaching identities. Becoming a teacher educator often involves a more complex and longer journey but according to the many travel stories told here, one that can be a deeply satisfying experience. This book was published as a special issue of *Professional Development in Education*.

landscape *Becoming a Teacher Educator* Anja Swennen, Marcel van der Klink, 2008-11-06 *Becoming a Teacher Educator* is an impressive book for teacher educators who want to be informed about the latest views and practices of their profession. It is the first book that addresses a range of topics related to the work of teacher educators: the induction of teacher educators and their further professional development. *Becoming a Teacher Educator* has a practical focus and it provides theoretical insights, experiences of experts and practical recommendations. The book is rooted in the Association of Teacher Education in Europe (ATEE) and many of the chapters are written by authors who are active members of the ATEE. Researchers and practitioners from different parts of Europe and beyond joined their efforts to write a book that is truly international and combines research practice and reflection. *Becoming a Teacher Educator* is essential reading for novice teacher educators as well as for experienced teacher educators who want to keep up with the latest insights in their profession. This book provides a guide for those who supervise novice and experienced teacher educators and for various professionals who are responsible for the professional development of teacher educators. There is a growing need for evidence-based resources made available to future teacher educators. Since a learning society requires new sets of competencies of the main actors, we are most in want of knowledgeable teacher educators that support the professional development of their student teachers. This book fits the actual demands. Dr Joost Lowyck, Professor Emeritus, former director of the Teacher Education Institute, Leuven University. This is an original book in a very important area. The editors define the concept of teacher educator widely and I think therefore that the book is relevant for schools, higher education and education authorities of all kinds. The authorship and theme have wide relevance across Europe, Australasia and North America. Prof Bob Moon, Professor in Education, Teaching Studies Department, Open University, UK. The book highlights that while the current global focus is very much on the need to educate sufficient and highly qualified teachers, little political focus is given to those who teach the teachers. What makes this book distinctive for all engaged in teacher education, whether experienced or novice, is that it allows the spotlight on those who teach the teachers and the opportunity for teacher educators to discuss, debate and seriously examine themselves as a profession. Simone White, Deakin University, Australia.

Teacher Educators as Members of an Evolving Profession Miriam Ben-Peretz, 2012-12-27 *Teacher Educators as Members of an Evolving Profession* focuses on the overall role of teacher educators who might be seen as leaders involved in the transformation of schools and schooling in a manner appropriate for the requirements of the 21st century. Teacher education is perceived in this book as a profession with unique characteristics. In the frame of this conception, this book provides and discusses relevant professional issues: the professional identity of teacher educators, their role perception and the characteristics of their vocational language. The pedagogy of teacher education is addressed and special attention is given to their professional development. The place of practice in this development process is considered. The contribution of research and academic writing as part of the professional development of teacher educators is emphasized. The book has two parts. The

first part Teacher educators roles identities and discourses deals with several aspects of being a teacher educator among them their knowledge base their professional language and their evolving roles The second part of the book The pedagogy of the professional development of teachereducators provides insights into different modes of enacting processes of professional development of teacher educators
