

The NSTA Learning Center

A Scalable e-Portal for Professional Development

The NSTA Learning Center

NSTA has launched an e-PD portal that is the national "home base" for science teachers in search of usable science content specifically tied to their individual professional development needs. Educators are able to diagnose their needs and gain access to a variety of PD resources and opportunities aligned to standards and grade bands they teach. Personalized tools within the learning center, such as *My PD Plan and Portfolio*, *My Library*, *My Calendar*, and *My Transcript*, will allow educators to manage, track, document, and certify their professional development growth over a period of time. The beta launch of the NSTA Learning Center and all the products below are available at <http://learningcenter.nsta.org>.

NSTA SciPacks are 5–10 hour discrete, online learning experiences to assist educators in understanding the science content they teach. SciPacks are based on the national science standards and accessible anytime, anywhere. The basic features common to all SciPacks is a set of three to five Science Objects, each with embedded simulations and related follow-up questions. In addition to the Science Objects, each SciPack contains a pedagogical section that provides the teaching context of the content. Each SciPack also provides individualized e-mail support from a content wizard and concludes with a graded assessment that if passed, allows a teacher to print a "certificate" demonstrating mastery understanding of the content addressed.

NSTA Science Objects are free one- to two-hour discrete learning experiences to enhance teachers' understanding of a particular idea, based on the science literacy goals in the national standards and tied to state standards. Each Science Object provides an understanding of the science content that supports curricula requirements by providing a structured set of learning experiences through simulations and embedded assessments. Science Objects challenge teachers to explore and explain real-world phenomena. Science Objects are founded on the principle that learners must be challenged with a problem, observation, data, etc., in order to develop scientific understanding.

NSTA SciGuides are online thematically based packages of pre-evaluated and standards-aligned web-accessible classroom resources for science teachers to use in their classroom. Each SciGuide consists of a library of approximately 100 web pages vetted against eight educational rubrics. Each SciGuide provides a brief content background description for the educator and links to the web-based resources. Each SciGuide has a set of tools to assist educators in implementing the web-based resources into their classroom with lesson plans, media vignettes, and samples of student work illustrating lesson outcomes.

NSTA Symposia experiences are face-to-face workshops that provide follow-up online learning opportunities, such as live web seminars and asynchronous threaded discussion. The content of Symposia is delivered in partnership with NASA, NOAA, FDA, and NSTA Press authors with offerings in STEM-related content areas.

NSTA Web Seminars are live professional development experiences that allow participants to interact with nationally acclaimed experts, scientists, engineers, and education specialists from NSTA government partners such as NASA, NOAA, NSF, FDA—all from the convenience of a desktop computer! Educators use their browser to mark up and annotate presenter's slides or share desktop applications in addition to engaging in chat with others and answering poll questions. Seminars are archived and available for viewing after the live event. Agency-sponsored web seminars are free and create learning opportunities for those unable to attend face-to-face opportunities.
