

The Periodic Law Activity

Name/Number: _____

Introduction The present organization of the elements is a product of the first periodic table published by Dmitri Mendeleev in 1869. The amazing accuracy of his predictions has been very important to chemists in this century. However, the basis of his arrangement was the atomic mass of the elements. This approach proved incorrect as it would have placed some elements in a family with dissimilar properties. Henry Moseley rearranged the table on the basis of the atomic numbers of the elements. In accordance with Moseley's revision, the **periodic law** states: *the properties of the elements are periodic functions of their atomic numbers*. Each of the 115 known elements has a unique set of characteristic properties. These range from solid to gas, lustrous to dull, low to high melting points, various colors, and so on. The elements are arranged within the periodic table into groups or families (vertical columns) and periods (horizontal rows). This arrangement reflects the periodic or repeating nature of the properties of the elements.

Learning Target Students will describe the following trends: atomic radii, ionization energy and electronegativity.

What the Numbers in the boxes mean

Atomic #	Code letter	Symbol
Ionization Energy (kJ/mol)		Phase
Atomic radius (pm)		Electronegativity

Procedure

- Each block on the table represents a different element from the first 4 periods of Groups 1, 2 and 13-18.
- Cut out blocks A - Z.
- The following sets of elements are in families: ZRD, PSIF, JXBE, LHT, QKA, WOV, GUN, and YMC.
- Use the following clues and arrange the elements in their proper order on the blank table provided.

J has an atomic number three times that of T.
 The atomic mass of L is 40.08 amu.
 U has a total of six electrons.
 S is an alkali metal.
 E is a noble gas.
 W is a liquid.
 Z has the smallest atomic mass in its group.
 B has ten protons.
 I has the largest atomic number in its group.
 O has an atomic number larger than V.
 D has the largest atomic mass of its group.
 X has an atomic number one higher than F.

L is an alkaline earth metal.
 S forms a compound with O that is used as a seasoning on food.
 Y is a metalloid.
 O is a halogen.
 The atomic mass of T is more than that of H.
 Q has an atomic mass 2 times that of A.
 M has an atomic number one less than that of A.
 The electrons of N are distributed over three energy levels.
 R has 13 protons in its nucleus.
 A is essential for all animals to breathe.
- When you have placed these 26 elements in their correct position, glue them in place.
- Check with your instructor for the correct answer.

Questions Answer questions 2 and 3 in complete sentences.

- In each block, fill in the element's atomic number in the upper left-hand corner and the element's correct symbol in the upper right hand corner. Attach this table to the FRONT of your lab when you turn it in.
- Define each of the following terms. Then examine your completed table. What *general observations* can be made of trends within *periods and groups* for the following properties? In your answer, include whether the following values tend to increase or decrease across the period and then whether it increases or decreases down a group. Please look at going left to right across the period and from top to bottom in the group.
 - Ionization Energy

Smith, Brian Broughman, Christine Hurt, 2022-04-14 Law plays a key role in determining the level of entrepreneurial action in society Legal rules seek to define property rights facilitate private ordering and impose liability for legal wrongs thereby attempting to establish conditions under which individuals may act These rules also channel the development of technology regulate information flows and determine parameters of competition Depending on their structure and implementation legal rules can also discourage individuals from acting It is thus crucial to determine which legal rules and institutions best enable entrepreneurs whose core function is to challenge incumbency This volume assembles legal experts from diverse fields to examine the role of law in facilitating or impeding entrepreneurial action Contributors explore issues arising in current policy debates including the incentive effect of legal rules on startup activity the role of law in promoting or foreclosing market entry and the effect of entrepreneurial action on legal doctrine The Bookseller, Newsdealer and Stationer ,1899

Iserlis, 2020-07-22 It is easily can be proved that the human brain equipped sense organs can work as an universal measuring tool and measure with sufficient accuracy after some training not only a distance mass or volume but and parameters of important personal functions Unfortunately this instrument does not have an indicator device panel and results of measurements usually hidden in the depth of subconscious part of mind To extract these results of measurements at first is

needed to find an access code for this information secondly to deduce this information in a convenient for perception form and after that to decipher it Based on this approach a new method of direct measurement of intellectual parameters was used for appraisal such characteristics of intellect and mind as creativity intuition willpower stress level vital energy index etc Verification of the accuracy of measurement of some bio physical parameters measured by the same method for example number of thrombocytes in the blood is carried out by comparison with laboratory blood tests Research and physical measurements of a person s intellectual abilities have shown that they can change significantly from the influence of many external factors and first of all of light electromagnetic and sound perceptions of the senses both for the better and for the worse This allows significantly increasing the capabilities and expanding the range of use of any entrainment technology Using algorithms of multi parameter optimization the method allows increasing the level of intellect and its components in several times practically for everyone Measurement of willpower and stress opens the prospect for many people to maintain their health and activity at the proper level throughout life In the book are collected also some rules and methods allowing to support intellectual abilities of the mind on an optimum level by means of mindset management control of the subconscious mind cognitive control and control emotions Method of measurement of intellectual abilities and compatibility of team members can be used in process of the hiring searching a bride etc
