Mathematics Curriculum in School Education Yeping Li, Glenda Lappan, 2013-11-19 Mathematics curriculum which is often a focus in education reforms has not received extensive research attention until recently. Ongoing mathematics curriculum changes in many education systems call for further research and sharing of effective curriculum policies and practices that can help lead to the improvement of school education. This book provides a unique international perspective on diverse curriculum issues and practices in different education systems, offering a comprehensive picture of various stages along curriculum transformation from the intended to the achieved and showing how curriculum changes in various stages contribute to mathematics teaching and learning in different educational systems and cultural contexts. The book is organized to help readers learn not only from reading individual chapters but also from reading across chapters and sections to explore broader themes including: Identifying what is important in mathematics for teaching and learning in different education systems; Understanding mathematics curriculum and its changes that are valued over time in different education systems; Identifying and analyzing effective curriculum practices; Probing effective infrastructure for curriculum development and implementation. *Mathematics Curriculum in School Education* brings new insights into curriculum policies and practices to the international community of mathematics education with 29 chapters and four section prefaces contributed by 56 scholars from 14 different education systems. This rich collection is indispensable reading for mathematics educators, researchers, curriculum developers, and graduate students interested in learning about recent curriculum development research and practices in different education systems. It will help readers to reflect on curriculum policies and practices in their own education systems and also inspire them to identify and further explore new areas of curriculum research for improving mathematics teaching and learning.

education have both grown in fertile directions in different geographic regions Yet the mainstream discourse in international
handbooks does not lend voice to developments in cognition curriculum teacher development assessment policy and
implementation of mathematics and science in many countries Paradoxically in spite of advances in information technology
and the flat earth syndrome old distinctions and biases between different groups of researcher s persist In addition limited
accessibility to conferences and journals also contribute to this problem The International Sourcebooks in Mathematics and
Science Education focus on under represented regions of the world and provides a platform for researchers to showcase
their research and development in areas within mathematics and science education The First Sourcebook on Asian Research
in Mathematics Education China Korea Singapore Japan Malaysia and India provides the first synthesized treatment of
mathematics education that has both developed and is now prominently emerging in the Asian and South Asian world The
book is organized in sections coordinated by leaders in mathematics education in these countries and editorial teams for each
country affiliated with them The purpose of unique sourcebook is to both consolidate and survey the established body of
research in these countries with findings that have influenced ongoing research agendas and informed practices in Europe
North America and other countries in addition to serving as a platform to showcase existing research that has shaped
teacher education curricula and policy in these Asian countries The book will serve as a standard reference for mathematics
education researchers policy makers practitioners and students both in and outside Asia and complement the Nordic and
