Search Computing Stefano Ceri, Marco Brambilla, 2012-11-06 Search computing which has evolved from service computing focuses on building the answers to complex search queries by interacting with a constellation of cooperating search services using the ranking and joining of results as the dominant factors for service composition. The field is multidisciplinary in nature and takes advantage of contributions from other research areas such as knowledge representation, human computer interfaces, psychology, sociology, economics, and legal sciences. This book is the third in the Search Computing series and contains a collection of 16 papers which in most cases were contributed to several workshops during 2011 organized by members of the Search Computing project in the context of major international conferences: ExploreWeb at ICWE 2011, Very Large Data Search and DBRank at VLDB 2011, DATAVIEW at ECOWS 2011, and OrdRing at ISWC 2011. The papers provide very useful insights on search computing problems and issues. The book has been divided into four parts focussing on extraction and integration, query and visualization, paradigms exploring linked data and games, social search and economics.

StarCraft, **Global esports** Dal Yong Jin, 2021-03-25 Global esports explores the recent surge of esports in the global scene and comprehensively discusses people's understanding of this spectacle. By historicizing and institutionalizing esports, the contributors analyze the rapid growth of esports and its implications in culture and digital economy. Dal Yong Jin curates a discussion as to why esports has become a global phenomenon. From games such as Spacewar to Starcraft to Overwatch, a key theme distinguishing this collection from others is a potential shift of esports from online to mobile gaming. The book addresses why many global game players and fans play and enjoy online and mobile games in professional game competitions and therefore they investigate the manner in which the transfer to and between online and mobile gaming culture is occurring in a specific subset of global youth. The remaining focus identifies the major platforms used to enjoy esports including broadcasting and smartphones. By analyzing these unexamined or less discussed agendas, this book sheds light on the current debates on the growth of global esports culture.

Video Games and the Law Elizabeth Townsend Gard, W. Ronald Gard, 2017-01-12

The video game industry is big business, not only in terms of the substantial revenue generated through retail sales of games themselves but also in terms of the size and value of parallel and secondary markets. Consider any popular video game today and you most likely are looking at a franchise that includes not only the game itself and all of its variants but also toys, books, movies and more, with legions of fans that interact with the industry in myriad ways. Surveying the legal landscape of this emergent industry, Ron Gard and Elizabeth Townsend Gard shed light on the many important topics where law is playing an important role.
