The Political Brain:

The Political Brain Drew Westen, 2008-05-06 The Political Brain is a groundbreaking investigation into the role of emotion in determining the political life of the nation For two decades Drew Westen professor of psychology and psychiatry at Emory University has explored a theory of the mind that differs substantially from the more dispassionate notions held by most cognitive psychologists political scientists and economists and Democratic campaign strategists The idea of the mind as a cool calculator that makes decisions by weighing the evidence bears no relation to how the brain actually works When political candidates assume voters dispassionately make decisions based on the issues they lose That's why only one Democrat has been re-elected to the presidency since Franklin Roosevelt and only one Republican has failed in that quest In politics when reason and emotion collide emotion invariably wins Elections are decided in the marketplace of emotions a marketplace filled with values images analogies moral sentiments and moving oratory in which logic plays only a supporting role Westen shows through a whistle stop journey through the evolution of the passionate brain and a bravura tour through fifty years of American presidential and national elections why campaigns succeed and fail The evidence is overwhelming that three things determine how people vote in this order their feelings toward the parties and their principles their feelings toward the candidates and if they haven't decided by then their feelings toward the candidates policy positions Westen turns conventional political analyses on their head suggesting that the question for Democratic politics isn't so much about moving to the right or the left but about moving the electorate He shows how it can be done through examples of what candidates have said or could have said in debates speeches and ads Westen's discoveries could utterly transform electoral arithmetic showing how a different view of the mind and brain leads to a different way of talking with voters about issues that have tied the tongues of Democrats for much of forty years such as abortion guns taxes and race You can't change the structure of the brain But you can change the way you appeal to it And here's how *Summary: The Political Brain* BusinessNews Publishing, 2017-01-30 The must read summary of Drew Westen's book The Political Brain The Role of Emotion in deciding the Fate of the Nation This complete summary of The Political Brain by Drew Westen a professor of psychology and psychiatry at Emory University presents his argument that emotion wins over reason during elections and illustrates how this is the case with a number of campaign ads debates and candidate profiles that have won voters hearts in America Added value of this summary Save time Understand the role of emotion in making political decisions Expand your knowledge of politics and psychology To learn more read The Political Brain and discover how emotion affects voters decisions and how political parties can make use of this knowledge **The Political Mind** George Lakoff, 2008 A New York Times best selling author explains how the physical nature of the brain affects people's political decisions suggesting that changing one's mind is just as much a physical process as it is a psychological function By the author of Don't Think of an Elephant 60 000 first printing Trials of Engagement Ali Fisher, Scott Lucas, 2010-12-17 In the last decade public diplomacy has become one of

the most important concepts in the development and implementation of foreign policy

Trials of Engagement The Future of US Public Diplomacy with contributors from leading scholars in disciplines from international relations to communications considers the challenges for this new public diplomacy especially as it is pursued by the US Government It highlights the challenges of aligning policy and projection overcoming bureaucratic tensions and the language used by public diplomats Most importantly the volume illustrates that the issues for public diplomacy are more than those of a producer seeking to win the hearts and minds of passive audiences *Trials of Engagement* portrays public diplomacy as an increasingly public project To overcome the trials of engagement public diplomacy must provide more than a rhetorical nod to a two way process Ultimately a collaborative public diplomacy must be built on a broad understanding of those involved the recognition of stakeholders as peers and effective interaction with networks made up of traditional and new interlocutors

The Believing Brain Michael Shermer, 2011-05-24 A wonderfully lucid accessible and wide ranging account of the boundary between justified and unjustified belief Sam Harris New York Times bestselling author of *The Moral Landscape* and *The End of Faith* In this work synthesizing thirty years of research psychologist historian of science and the world's best known skeptic Michael Shermer upends the traditional thinking about how humans form beliefs about the world Simply put beliefs come first and explanations for beliefs follow The brain Shermer argues is a belief engine From sensory data flowing in through the senses the brain naturally begins to look for and find patterns and then infuses those patterns with meaning Our brains connect the dots of our world into meaningful patterns that explain why things happen and these patterns become beliefs Once beliefs are formed the brain begins to look for and find confirmatory evidence in support of those beliefs which accelerates the process of reinforcing them and round and round the process goes in a positive feedback loop of belief confirmation Shermer outlines the numerous cognitive tools our brains engage to reinforce our beliefs as truths Interlaced with his theory of belief Shermer provides countless real world examples of how this process operates from politics economics and religion to conspiracy theories the supernatural and the paranormal Ultimately he demonstrates why science is the best tool ever devised to determine whether or not a belief matches reality A must read for everyone who wonders why religious and political beliefs are so rigid and polarized or why the other side is always wrong but somehow doesn't see it Dr Leonard Mlodinow physicist and author of *The Drunkard's Walk* and *The Grand Design* with Stephen Hawking

Vulnerable Minds Liya Yu, 2022-08-16 Neuroscience research has raised a troubling possibility Could the tendency to stigmatize others be innate Some evidence suggests that the brain is prone to in group and out group classifications with consequences from ordinary blind spots to full scale dehumanization Many are inclined to reject the argument that racism and discrimination could have a cognitive basis Yet if we are all vulnerable to thinking in exclusionary ways if everyone from the most ardent social justice advocates to bigots and xenophobes has mental patterns and structures in common could this shared flaw open new prospects for political rapprochement Liya Yu develops a novel political framework that builds on

neuroscientific discoveries to rethink the social contract She argues that our political selves should be understood in terms of our shared social capacities especially our everyday exclusionary tendencies Yu contends that cognitive dehumanization is the most crucial disruptor of cooperation and solidarity and liberal values based discourse is inadequate against it She advances a new neuropolitical language of persuasion that refrains from moralizing or shaming and instead appeals to shared neurobiological vulnerabilities Offering practical strategies to address those we disagree with most strongly *Vulnerable Minds* provides timely guidance on meeting the challenge of including and humanizing others *Persuasion in Society* Jean G. Jones, Herbert W. Simons, 2017-04-07 *Persuasion in Society* Third Edition introduces readers to the rich tapestry of persuasive technique and scholarship interweaving rhetorical critical theory and social science traditions This text examines current and classical theory through the lens of contemporary culture encouraging readers to explore the nature of persuasion and to understand its impact in their lives Employing a contemporary approach authors Jean G Jones and Herbert W Simons draw from popular culture mass media and social media to help readers become informed creators and consumers of persuasive messages This introductory persuasion text offers A broad based approach to the scope of persuasion expanding students understanding of what persuasion is and how it is effected Insights on the diversity of persuasion in action through such contexts as advertising marketing political campaigns activism and social movements and negotiation in social conflicts The inclusion of sender and receiver perspectives enhancing understanding of persuasion in practice Extended treatment of the ethics of persuasion featuring opposing views on handling controversial issues in the college classroom for enhanced instruction Case studies showing how and why people fall for persuasive messages demonstrating how persuasion works at a cognitive level Discussion questions exercises and key terms for very nearly every chapter The core of this book is that persuasion is about winning beliefs and not arguments and that communicators who want to win that belief need to communicate with their audiences This new edition of *Persuasion in Society* continues to bring this core message to readers with updated case studies examples and sources Government (political) Ownership and Operation and the Electric Light and Power Industry National Electric Light Association, 1928 **The Politics of Compassion** Edward U. Murphy, 2018-11-23 *The Politics of Compassion* explores the manifold obstacles that hinder our individual and collective capacity to care for the vulnerable offering insights from history religion ethics cognitive and social sciences international relations public policy and contemporary politics It examines both how far we've come in addressing poverty and social injustice and how far we still have to go It concludes by discussing strategies to help us achieve a more consistent practice of compassion in public life *Evolution, Politics and Charisma* Elesa Zehndorfer, 2019-02-25 *Evolution Politics and Charisma* Why do Populists Win shines compelling new light on the way in which the systematic targeting and manipulation of human physiology remain a cornerstone of all populist political campaigns Readers wishing to make sense of the populist juggernauts of Trump and Brexit and of the cyclical and formulaic nature of the rise and fall of charismatic

populism will find this book particularly appealing. Elesa Zehndorfer begins by presenting a highly applied explanation of the critical importance of political physiology, physiology theory, neuroscience, and evolutionary biology in populist charismatic politics. She later eloquently explains how manipulation of physiological variables such as heightened testosterone and dopamine renders the political rally one of the most powerful weapons in a populist leader's campaign. Weber's seminal conceptualisation of charisma in *statu nascendi* and Hyman Minsky's insightful theories of cyclical boom and bust scenarios are then juxtaposed alongside physiological theory to greatly amplify our understanding of the powerful biological antecedents of charismatic populism. These theoretical observations are then applied directly to recent high profile populist campaigns including the 2016 Trump Presidential campaign and early Presidency and the Brexit referendum to elucidating and compelling effect. Ultimately, *Evolution, Politics and Charisma* paints a clear evolutionary picture of the way in which politics is an emotional, not a rational process where our emotions are continually targeted to great and strategic effect and where the most recent intersection of technology and physiology has driven the greatest surge in populism ever seen across the Western hemisphere since the 1930s. Acknowledging this reality opens up exciting vistas in our understanding of the true power of charismatic populism and provides answers as to how its seductive and often dangerous power can be effectively resisted.

Nationalist Passions Stuart J. Kaufman, 2015-11-06 Nationalist and ethnic conflict can take many forms from genocidal violence and civil war to protest movements and peaceful squabbles in democracies. *Nationalist Passions* poses a stark challenge to extreme rationalist understandings of political conflict. Stuart J. Kaufman elaborates a compelling theory of ethnic politics to explain why ethnic violence erupts in some contexts and how peace is maintained in others. At the core of Kaufman's theory is an assertion that conflicts are initiated due to popular symbolic predispositions, biases of all kinds, and perceptions of threat. Kaufman puts his theory to the test in a range of conflicts. He examines some highly violent episodes among them the Muslim rebellion in the southern Philippines beginning in the 1970s, the civil war in southern Sudan that began in the 1980s, and the Rwanda genocide of 1994. Kaufman also analyzes other situations in which leaders attempted to tame the violence that nationalist passions can generate. In India, Mahatma Gandhi mobilized an overtly nonviolent movement but failed in his efforts to prevent the rise of Muslim-Hindu communal violence. In South Africa, Nelson Mandela and F. W. de Klerk ended apartheid but not without terrible cost: more than fifteen thousand people died while the negotiations were under way. In Tanzania, however, Julius Nyerere led one of the few ethnically diverse countries in the world with almost no ethnic violence. *Nationalist Passions* is essential reading for policymakers, international aid workers, and all others who seek to find the best possible outcomes for future internal and interstate clashes.

Qvortrup,2023-12-20 We have politics on our mind or rather we have politics in different parts of our brains In this path breaking study Matt Qvortrup takes the reader on a whistle stop tour through the fascinating and sometimes frightening world of neuropolitics the discipline that combines neuroscience and politics and is even being used to win elections Putting the science back into political science *The Political Brain* shows how fMRI scans can identify differences between Liberals and Conservatives can predict our behaviour with sometimes greater accuracy than surveys and can explain the biology of uprisings revolutions and wars Not merely a study of empirical evidence the book shows how the philosophical theories of among others Plato Aristotle and Spinoza can be supported by brain scans Along the way it also provides an overview of the state of the art knowledge of the organ that shapes our politics The book shows that if we rely on evolutionary primitive parts of the midbrain those engaged when we succumb to polarised politics we stand in danger of squandering the gains we made through the last eight million years **The Ways of Federalism in Western Countries and the Horizons of Territorial**

the present day challenges of their respective systems The objective thus is to contribute ideas which might help to address the evolution of the Spanish system in the light of the experience of more established Federations This first volume analyses the challenges facing federal systems in the age of globalisation from a global perspective It also addresses current questions and the challenges faced today by in the sphere of the internal division of powers the most significant western federal systems on the one hand and the Spanish system of territorial autonomy on the other *Systems from Hell* David A.

The Green Book Duncan Brack,2013-03-08 Leading Liberal Democrats and policy experts re examine their political approach and propose a radical new direction for the party setting the agenda for the next election and beyond The Green Book cogently argues that a low carbon economy and environmental investments are the best way to escape from sluggish growth create new jobs and share prosperity It is a clarion call for Liberal Democrats to treat the environmental crisis as a core challenge of economic policy not a discrete problem Policies that protect and enhance the natural world on which our economy and society ultimately depend for our health well being and prosperity should be the driving force behind the party s programme Furthermore green policies can provide a vital clear and popular distinction between Liberal Democrats and Conservatives at the next election The Green Book offers a challenge to current Liberal Democrat thinking and stimulating reading to anyone who cares about the environment and the future of the British economy
