Human Evolution beyond Biology and Culture Jeroen C. J. M. van den Bergh, 2018-10-18 Both natural and cultural selection played an important role in shaping human evolution Since cultural change can itself be regarded as evolutionary a process of gene culture coevolution is operative The study of human evolution in past present and future is therefore not restricted to biology An inclusive comprehension of human evolution relies on integrating insights about cultural economic and technological evolution with relevant elements of evolutionary biology In addition proximate causes and effects of cultures need to be added to the picture issues which are at the forefront of social sciences like anthropology economics geography and innovation studies This book highlights discussions on the many topics to which such generalised evolutionary thought has been applied the arts the brain climate change cooking criminality environmental problems futurism gender issues group processes humour industrial dynamics institutions languages medicine music psychology public policy religion sex sociality and sports

The Joy of Secularism George Levine, 2021-05-11 The case for a thoughtful secularism from some of today's most distinguished scientists philosophers and writers Can secularism offer us moral aesthetic and spiritual satisfaction Or does the secular view simply affirm a dog eat dog universe At a time when the issues of religion evolution atheism fundamentalism Darwin and science fill headlines and invoke controversy *The Joy of Secularism* provides a balanced and thoughtful approach for understanding an enlightened sympathetic and relevant secularism for our lives today Bringing together distinguished historians philosophers scientists and writers this book shows that secularism is not a mere denial of religion Rather this positive and necessary condition presents a vision of a natural and difficult world without miracles or supernatural interventions that is far richer and more satisfying than the religious one beyond From various perspectives philosophy evolutionary biology primate study Darwinian thinking poetry and even bird watching the essays in this collection examine the wealth of possibilities that secularism offers for achieving a condition of fullness Factoring in historical contexts and ethical and emotional challenges the contributors make an honest and heartfelt yet rigorous case for the secular view by focusing attention on aspects of ordinary life normally associated with religion such as the desire for meaning justice spirituality and wonder Demonstrating that a world of secular enchantment is a place worth living in *The Joy of Secularism* takes a new and liberating look at a valuable and complex subject The contributors are William Connolly Paolo Costa Frans de Waal Philip Kitcher George Levine Adam Phillips Robert Richards Bruce Robbins Rebecca Stott Charles Taylor and David Sloan Wilson

(Dis)Entangling Darwin Jorge Bastos da Silva, Fátima Vieira, 2012-03-15 Charles Darwin's curiosity had a remarkable childlike enthusiasm driven by an almost compulsive appetite for a constant process of discovery which he never satiated despite his many voyages He would puzzle about the smallest things from the wonders of barnacles to the different shapes colours and textures of the beetles which he obsessively collected from flowers and stems to birds music and language and would dedicate years to understanding the potential

significance of everything he saw Darwin's findings and theories relied heavily on that same curiosity on seeking and answering questions however long these would take to clarify His son Francis Darwin often recalls how he would ask himself now what do you want to say and his answer written down would often disentangle the confusion In fact disentangling confusions seems to have been the driving force behind Darwin's scientific pursuits as he was struck with bewilderment when contemplating the luxuriousness of life It was also the impetus for this book The true implications of Darwin's legacy remain as controversial to the critics of our time as they were to his contemporaries Darwin's impact within and beyond the biological sciences is both daunting and exhilarating and attests to the need for an interdisciplinary approach by remaining a challenge to many scholars in the most diverse fields The recent revival of his theories has opened a Pandora's box of different theoretical studies that are particularly receptive to exploring new and exciting angles of research Exchanges between Literature and Science from the 1800s to the 2000s Márcia Lemos, 2017-03-07 This collection of essays responds to the intense interest that the relations between the discourses of literature and other cultural practices and those of science have obtained throughout various fields of study Spanning a period between the mid nineteenth century and the twenty first century the work collected here is firmly focused on the cultural significance of scientific discoveries and practices and especially on the manifold representations of science and scientists in literature and the arts Its four sections develop from an initial moment of dwindling indefiniteness of borders between literature and the sciences to the historical perception of an increasing divide between the two cultures to use C P Snow's influential expression as well as calls for a form of convergence or consilience in Edward Wilson's words The final section turns to the medical sciences a porous scientific discipline in relation to the humanities which suggests that consilience can already be found partially in specific areas As such this collection contributes towards critically extending that integration through the discussion of key literary representations of science its promises and its problems *Philosophy for Children Through the Secondary Curriculum* Lizzy Lewis, Nick Chandley, 2012-05-31 Philosophy for Children P4C is an approach to learning and teaching that aims to develop reasoning and judgement Students learn to listen to and respect their peers opinions think creatively and work together to develop a deeper understanding of concepts central to their own lives and the subjects they are studying With the teacher adopting the role of facilitator a true community develops in which rich and meaningful dialogue results in enquiry of the highest order Each chapter is written by a leading P4C expert and provides an introduction to the relationship between P4C and the subject area lesson stimuli and activities for extending and deepening students thinking The book includes guidance on how to embed P4C in curriculum subjects in a crowded and demanding secondary curriculum timetable troubleshooting advice for the teacher turned facilitator a companion website containing useful links downloadable resources and material to display on your interactive whiteboard Edited and collated by the UK's leading P4C organisation this book introduces a rationale for using and adapting P4C in the secondary curriculum *Prodigal Daughters* Helen Martineau, 2015-07-17 Prodigal

Daughters affirms what artists have always known that their work has an inner spiritual source and power It weaves the arts of music dance drama literature architecture and visual forms into a living tapestry of sounds shapes colours words and movements as dynamic influences in the bloodstream of society challenging enriching and awakening us to beauty and our own potentials Written in a lively and engaging style this innovative book is accessible despite treating profound truths that shape human destiny Helen Martineau celebrates artistic expression with an original vision that discloses the nature of the creative process and connects with the deepest layers of the self The reader is invited to re imagine themselves and the world through perspectives from the arts by undertaking this journey with a sure guide who has been a practising artist for most of her life
