Decision-making Raymond Edson Willis, Norman L. Chervany, 1974 New Quantitative Techniques for Economic Analysis
Giorgio P. Szegö, 2014-05-10 Economic Theory Econometrics and Mathematical Economics New Quantitative Techniques for
Economic Analysis provides a critical appraisal of the results the limits and the developments of well established quantitative
techniques This book presents a detailed analysis of the quantitative techniques for economic analysis Organized into four
parts encompassing 16 chapters this book begins with an overview of the general questions concerning models and model
making This text then provides the main results and various interesting economic applications of some quantitative
techniques that have not been widely used in the economic field Other chapters consider the principle of optimality in
dynamic programming wherein the infinite sequence of consumption saving decisions can be reduced to one decision This book
discusses as well the methods for online control and management of large scale systems The final chapter deals with special
problems This book is a valuable resource for economists social scientists epistemologists economic historians and research
workers *Risk Behaviour and Risk Management in Business Life* Bo Green, 2013-03-09 Risk behaviour and risk
management in business life influence a wide range of fields in which only a very limited amount of research has been
undertaken These topics have often been treated as if they were theoretically and practically isolated from other fields the so
called risk archipelago problem What is actually needed is another focus in which the problem of risk is treated as a central
theme The demand for interdisciplinary research means that there is a need for crossing scientific boundaries In approaching
risk problems from a holistic perspective there is also a parallel need for linking the scientific and the business worlds
Researchers must work closely together in concrete multidisciplinary research projects and in co operation with the
industrial world in seeking out and solving research problems of importance This book contains selected and re written
papers and key note speeches presented in a risk seminar that Stockholm University organised in June 1997 The seminar in
which 200 researchers and practitioners from 26 countries participated was divided into four main topic areas Risk
Assessment and Credit Management Psychology in Business Life Risk Management in Small Firms and Law and Business
Risk In writing this book the editor invited eight professors from four continents to assist him in introducing the reader to the
different and scientific disciplines and in explaining the need for interdisciplinary multidisciplinary and cross disciplinary risk
research projects The book consists of eight chapters and the target groups are researchers doctoral and master students at
universities and business people working in the risk management area **Leveraging Developing Economies with the**
