FACTORS AFFECTING THE PERFORMANCE OF THE GRADE 9 STUDENTS IN SCIENCE AND MATHEMATICS USING THE SELF-LEARNING MODULES IN THE NEW NORMAL

Introduction

Student's performance or academic achievement is an important factor that contributes in producing competitive graduates in the future. According to Imam (2016), for the last decade, the quality of Philippine education was put into a bigquestion due to poor performance of students in science and mathematics tests both local and abroad. The initial result of current efforts of the government by adopting K-12 curriculum didn't do much to change the status quo.

This study would like to determine several factors that affects the performance of the students using the self-learning modules in science and mathematics in the new normal. Some of the possible factors could be the reading skills and comprehension of the students, sex, age and the parents' educational background of the students.

a. Reading skills and comprehension skills

Reading skills are the abilities of an individual such as one's capacity to read, interpret and comprehend the written language or texts. Reading skills includes several important aspects that work together in order to develop overall literacy skills, comprehension, fluency, vocabulary and strategies that help readers interpret and find meaning in texts. Comprehension skills are
