

FEATURES . . .

- ① **HYDRAULIC LIFT OUT** of one piece hood and conveyor (or conveyors) for ease of cleaning and maintenance.
- ② **HYDRAULIC CONVEYOR DRIVES** for reliability, water resistance and efficient self-contained system.
- ③ **Increased operating efficiency** due to the **TWO INDIVIDUALLY CONTROLLED AND MONITORED HEAT ZONES.** In Zone (1), high heat is provided where cold product first enters the Fryer; in Zone (2), maintained heat is provided to level off and control frying oil temperature.
- ④ **Of all heat transfer methods utilized,** the direct fired immersion tube transfers the most heat to the frying oil in the least amount of time, with no burning, scorching, hot spots or overheating of oil, and with less total fuel consumption due to **MODULATING FLAME CONTROL.**
- ⑤ **A COOL ZONE** is actually built into the Fryer tank. The temperature of the frying oil under the immersion tubes is approximately 100° F. lower than the actual frying oil

temperature. Consequently, there is less probability of cooking and charring sediment crumbs which add to possible free fatty acid problems.

- ⑥ **SEDIMENT REMOVAL BELT** constantly pushes all sediment on the bottom of tank to a well, where a mechanical screw moves it to the drain where sediment can be pumped to the filter for removal from oil.*
- ⑦ **TOP SUBMERGER** is always in place and ready to use for products that become buoyant. Simple jack bolts permit it to be raised and lowered easily.*
- ⑧ **AUTOMATIC LEVEL CONTROL** adds make-up oil to the Fryer as needed, maintaining a constant level for uniform cooking.
- ⑨ **A CENTRAL CONTROL PANEL** with numerous electrical interlocks is provided for safe operation. The panel may be remotely mounted by the customer in a convenient location.

* Accessory Items
