New Directions in Assessing Historical Thinking Kadriye Ercikan,Peter Seixas,2015-02-20 New technologies have radically transformed our relationship to information in general and to little bits of information in particular The assessment of history learning which for a century has valued those little bits as the centerpiece of its practice now faces not only an unprecedented glut but a disconnect with what is valued in history education More complex processes historical thinking historical consciousness or historical sense making demand more complex assessments At the same time advances in scholarship on assessment open up new possibilities For this volume

Kadriye Ercikan and Peter Seixas have assembled an international array of experts who have collectively moved the fields of history education and assessment forward. Their various approaches negotiate the sometimes conflicting demands of theoretical sophistication, empirically demonstrated validity, and practical efficiency. Key issues include articulating the cognitive goals of history education, the relationship between content and procedural knowledge, the impact of students' language literacy on history assessments, and methods of validation in both large scale and classroom assessments. *New Directions in Assessing Historical Thinking* is a critical research oriented resource that will advance the conceptualization, design, and validation of the next generation of history assessments. Common Sense Questions about Tests Gerard Giordano, 2016-03-07. Parents had questions about the tests their children took at school. They considered them to be common sense questions. They posed them to the businesspeople, publishers, and politicians who championed tests. They also posed them to the school administrators, teachers, and union leaders who criticized them. This book examines the questions the parents posed, the answers they elicited, and the changes they prodded.

The SAGE Guide to Educational Leadership and Management Fenwick W. English, 2015-01-29. The SAGE Guide to Educational Leadership and Management allows readers to gain knowledge of educational management in practice while providing insights into challenges facing educational leaders and the strategies, skills, and techniques needed to enhance administrative performance. This guide emphasizes the important skills that effective leaders must develop and refine, including communication, developing teams, coaching, and motivating, and managing time and priorities. While being brief, simply written, and a highly practical overview for individuals who are new to this field, this reference guide will combine practice and research, indicate current issues and directions, and choices that need to be made. Features: Benefits: 30 brief, signed chapters are organized in 10 thematic parts in one volume, available in a choice of electronic or print formats, designed to enable quick access to basic information. Selective boxes enrich and support the narrative chapters with case examples of effective leadership in action. Chapters conclude with bibliographic endnotes and references to further readings to guide students to more in-depth presentations in other published sources. Back matter includes an annotated listing of organizations, associations, and journals focused on educational leadership and administration, and a detailed index. This reference guide will serve as a vital source of knowledge to any students pursuing an education degree, as well as for individuals interested in the subject matter that do not have a strong foundation of the topic.

Building a Learning Culture in America Kevin Chavous, 2017-07-05. Building a Learning Culture in America takes an incisive, no-holds-barred look at how America embraced and cultivated a culture of learning in the past, how that culture declined in the sixties and seventies, and what must be done to regain it. From political gridlock to systemic discrimination, Chavous details the many ways education today is off track and cites specific examples of what Americans might do to reform it. Part memoir and part manifesto, this is a frank, fascinating, and personal account of Chavous' experience as a politician working to enact school choice in Washington DC and throughout the United States. During the

course of his political career he has seen political skirmishes and party scuffles interfere with the United States ability to improve its educational system These conflicts did not cause the problem they were merely a result The true problem was more basic the decline of America's learning culture This pivotal work calls for Americans to unite in making the changes needed to re-establish a learning culture as an inherent piece of the American national fabric and tells us how to begin
