How to Use Problem-based Learning in the Classroom Robert Delisle,Association for Supervision and Curriculum Development,1997 Engaging and motivating students especially the least motivated learners is a daily challenge But with the process of problem based learning PBL any teacher can create an exciting active classroom where students themselves eagerly build problem solving skills while learning the content necessary to apply them With problem based learning students work begins with an ill defined problem Key to this problem is how it explicitly links something important in students daily lives to the classroom This motivational feature is vital as students define the what where and how of resolving the problem situation Problem based learning may sound potentially chaotic and haphazard but it rests on the firm foundation of a teacher s work behind the scenes The teacher develops a problem long before students see it specifically choosing the skills and content the problem will emphasize and matching those to curriculum and standards Though a PBL

problem will have no right answer the teacher structures the experience so that specific learning takes place as students generate the problem solving steps research issues and produce a final product The teacher guides without leading assists without directing Current Index to Journals in Education ,1994 **The Publishers Weekly** ,1917 **The Bill of Rights and Beyond** ,1990 *Report of the Survey of the Pasadena City Schools* Pasadena (Calif.).
