

Usability Testing Checklist

This template is a general usability checklist. As every product, SaaS tool, app, and website is different, it will need to be adapted for your project(s).

- ☐ **Navigation:** is the app or software navigation and UX intuitive and easy to use? Can testers find their way around the app without difficulty?
- ☐ **Readability:** is the text/copy legible and easily understood? Are fonts and colors consistent across all pages?
- ☐ **Accessibility:** is the product or app accessible to users with disabilities, such as visual impairments? Are we adhering to web accessibility guidelines and best practices?
- ☐ **Error handling and bugs:** are error messages correctly displayed, and are they clear and helpful for users?
- ☐ **Performance:** does the software/product run as expected across different devices, operating systems, or browsers? If so, does it perform well across these testing environments?
- ☐ **Load times and speed:** are page load times as expected across every page of the app or product?
- ☐ **User control:** does the product give users control over their interactions? Does it feel responsive? Can they take the actions you want them to take?
- ☐ **User flow and UX:** is the user flow logical and intuitive? Can users complete tasks within a reasonable timeframe? When do they experience frustration?
- ☐ **Self-help and documentation:** Can users easily find self-help documents and content, is it accessible, and understandable for non-technical users?
