World Development Report 198:

World Development Report 2013 World Bank, 2012-10-15 Jobs provide higher earnings and better benefits as countries grow but they are also a driver of development Poverty falls as people work their way out of hardship and as jobs empowering women lead to greater investments in children Efficiency increases as workers get better at what they do as more productive jobs appear and less productive ones disappear Societies flourish as jobs bring together people from different ethnic and social backgrounds and provide alternatives to conflict Jobs are thus more than a byproduct of economic growth They are transformational they are what we earn what we do and even who we are High unemployment and unmet job expectations among youth are the most immediate concerns But in many developing countries where farming and self employment are prevalent and safety nets are modest are best unemployment rates can be low In these countries growth is seldom jobless Most of their poor work long hours but simply cannot make ends meet And the violation of basic rights is not uncommon Therefore the number of jobs is not all that matters jobs with high development payoffs are needed Confronted with these challenges policy makers ask difficult questions Should countries build their development strategies around growth or should they focus on jobs Can entrepreneurship be fostered especially among the many microenterprises in developing countries or are entrepreneurs born Are greater investments in education and training a prerequisite for employability or can skills be built through jobs In times of major crises and structural shifts should jobs not just workers be protected And is there a risk that policies supporting job creation in one country will come at the expense of jobs in other countries The World Development Report 2013 Jobs offers answers to these and other difficult questions by looking at jobs as drivers of development not as derived labor demand and by considering all types of jobs not just formal wage employment The Report provides a framework that cuts across sectors and shows that the best policy responses vary across countries depending on their levels of development endowments demography and institutions Policy fundamentals matter in all cases as they enable a vibrant private sector the source of most jobs in the world Labor policies can help as well even if they are less critical than is often assumed Development policies from making smallholder farming viable to fostering functional cities to engaging in global markets hold the key to success

From "Climate-Smart" to "Climate-Just Agriculture" Anthony Pahnke, 2025-07-03 Combining innovative social theory with ongoing policy discussions on climate change this book analyzes past and present efforts at challenging global poverty through reforming the dynamics of worldwide agricultural production Focusing on the efforts of the World Bank and CGIAR research centers particularly through research and projects that have been launched by the International Maize and Wheat Improvement Center CIMMYT and the International Food Policy Research Institute IFPRI Climate Smart to Climate Just exposes how neoliberal principles of limited government and individual entrepreneurship have expanded through the development of Climate Smart Agriculture At the same an alternative Climate Just Agriculture is becoming possible as rightwing populists have disrupted international free trade

orthodoxy and social movement demands for food sovereignty gain traction in key international spaces As Pahnke explains in this innovative account Climate Just Agriculture includes structural changes to free trade agreements that would build from local and regional food systems to make them resilient in the face of the adverse effects of climate change This resiliency moreover allows marginalized groups the capacity to create and participate in markets that allow for greater self sufficiency to push back on colonialism and imperialism Written in a clear and accessible style this book will be essential reading for students and scholars of sociology environmental studies and politics as well as for policymakers and professionals involved in climate change policy and the agriculture and food industry

World Development Report 2006 Francisco H. G.

Ferreira,Michael Walton,2005-01-01 Inequality of opportunity both within and among nations sustains extreme deprivation results in wasted human potential and often weakens prospects for overall prosperity and economic growth concludes the 2006 World Development Report To correct this situation and reduce poverty more effectively Equity and Development recommends ensuring more equitable access by the poor to health care education jobs capital and secure land rights among others It also calls for greater equality of access to political freedoms and political power breaking down stereotyping and discrimination and improving access by the poor to justice systems and infrastructure To level the playing field among countries and thereby reduce global inequities that hurt the poor in developing countries the report calls for removal of trade barriers in rich countries flexibility to allow greater in migration of lower skilled people from developing countries and increased and more effective development assistance

Global Insolvency and Bankruptcy Practice for Sustainable

Economic Development Dubai Economic Council,Adrian Cohen,2016-04-29 How an economy handles financial and business distress has a major impact on confidence in business the availability of investment the cost of credit and economic growth

The financial crisis of 2007 2008 and its aftermath was a catalyst to legal reform in the field of bankruptcy and restructuring law and brought an added focus to the systemic threat of bank failure to the financial system This book explores the general principles and practice of legal reform within bankruptcy From a variety of specialists including practitioners lawyers bankers accountants and judges from the United Arab Emirates the UK and Singapore it provides a variety of perspectives on the topic Chapters include topics such as the Four Pillars of Regulatory Framework the history and application of the UNCITRAL Model Law on Cross Border Insolvency the challenges for financial institutions and the treatment of the insolvency of natural persons The book also offers a comparative study of Islamic Shari ah principles with modern bankruptcy regimes an analysis of bankruptcy in the UAE and an evaluation of the legal infrastructure of the DIFC Courts The authors explore core questions surrounding bankruptcy law including its ability to facilitate the turnaround of business to enable efficient reallocation of capital to provide coherent rules for entrepreneurs investors employees and creditors and to provide for both appropriate sanctions and for rehabilitation

Development and Social Change Philip

McMichael,2016-01-25 In this new Sixth Edition of Development and Social Change A Global Perspective author Philip

McMichael describes a world undergoing profound social political and economic transformations from the post World War II era through the present. He tells a story of development in four parts: colonialism, developmentalism, globalization, and sustainability, that shows how the global development project has taken different forms from one historical period to the next. Throughout the text, the underlying conceptual framework is that development is a political construct created by dominant actors: states, multilateral institutions, corporations, and economic coalitions, and based on unequal power arrangements. While rooted in ideas about progress and prosperity, development also produces crises that threaten the health and well-being of millions of people and sparks organized resistance to its goals and policies. Frequent case studies make the intricacies of globalization concrete, meaningful, and clear.

Development and Social Change: A Global Perspective challenges us to see ourselves as global citizens even as we are global consumers.

Resources in Education, 1981-07 *Anatomy of Development* Bikram Pattanaik, 2025-03-20. This book details the fundamentals of development studies by adopting a multi-disciplinary approach. It presents a balanced mix of economic, social, political, cultural, and administrative premises of development and analyzes its theoretical and practical dimensions. It also provides insight into the role of the stakeholders of development in different sectors. The volume provides a holistic understanding of development, effectively demonstrating how it differs from economic growth.

Beginning with development theories, paradigms, and actors involved in the development process, this book goes on to explain the concepts of development administration, development governance, development planning, development management, and development communication. One of the fundamental components of the book is the elucidation of Development Theories: classical, neoclassical, developmental, and heterodox theories essential to the discipline of development. This book will be useful to undergraduate and postgraduate students, researchers, teachers of development studies, economics, sociology, political science, and public administration. It will also be useful to administrators and development administration officials of state and central governments, planners, policymakers, and people working in NGOs, in addition to corporate sector functionaries dealing with corporate social responsibilities and those handling developmental issues and challenges.

[Property for People, Not for Profit](#) Ulrich Duchrow, Franz J. Hinkelammert, 2008-02-29. The issue of private property and the rights it confers remain almost undiscussed in critiques of globalization and free market economics. Yet property lies at the heart of an economic system geared to profit maximization. The authors describe the historically specific and self-consciously explicit manner in which it emerged. They trace this history from earliest historical times and show how, in the hands of Thomas Hobbes and John Locke in particular, the notion of private property took on its absolutist nature and most extreme form, a form which neoliberal economics is now imposing on humanity worldwide through the pressures of globalization. They argue that avoiding the destruction of people's ways of living and of Nature requires reshaping our notions of private property. They look at practical ways for social and ecumenical movements to press for alternatives.

The World Bank Legal Review, Volume 7: Financing and Implementing the Post-2015 Development

Agenda Frank Fariello, Laurence Boisson de Chazournes, Kevin E. Davis, 2016-09-06 The newly adopted post 2015 development agenda is centered on 17 sustainable development goals to be reached by 2030 This volume of the World Bank Legal Review looks at how law and justice systems can support the financing and implementation of these goals including the role of the rule of law and economic and social rights The contributors including legal scholars development practitioners and financial experts analyze the goals explore ways in which they can be achieved and examine ways that recent relevant law and justice programs have worked A wide array of topics are covered from the legal aspects of collecting and monitoring vital data to improving legal identity programs to creating innovative health care regulation to legal and judicial reform to providing private sector financing of public education projects to the provision of global public goods Additionally a special section on Europe looks at financial crisis management enforcement of court decisions and the workings of the European Court of Justice The opportunities and challenges of the 2030 agenda are many This volume looks at both from multiple perspectives demonstrating how sustainable development can go forward in a way in which everyone benefits Regulating for Equitable and Job-Rich Growth Colin Fenwick, Valérie Van Goethem, 2017-12-29 This book offers a critical reflection on the operation and effects of labour regulation It articulates the broad goals and extensive potential for it to contribute to inclusive development while also considering the limits of some areas of regulation and governance **Global Political Economy** John Ravenhill, 2008 An authoritative introduction to Global Political Economy The book covers all bases contemporary theory introductions to particular issue areas and an extended debate on globalization that reflects a variety of perspectives The book is accompanied by an Online Resource Centre Student resources Timeline Web links Glossary Instructor resources Tables and figures from the book to download 2 in depth case studies **Against Global Apartheid** Patrick Bond, 2003 In *Against Global Apartheid* Patrick Bond reveals the extent of the economic and human damage caused by policies implemented by World Bank and the IMF in developing countries particularly South Africa and argues that there is another way to more socially just economic development *Availability of World Energy Resources* D.C. Ion, 2012-12-06 Energy will be a most important topic in the 1980s The speed with which a dozen or more trends will develop will be critical Most of these trends are interdependent and interacting and include the degree of constraint on oil and gas supplies exercised by the producers whether inside or outside the OPEC as they each attempt to match production to their own energy needs and the funding of their own economic growth from exports the depth of the appreciation by industrialized countries that energy supplies will be tight and fossil fuels will be very expensive at least until the end of the century the actions taken by those countries to ameliorate this situation in exploration for new oil and gas sources in exploitation effort for new coal supplies in acceptance of the need for expansion of nuclear energy supplies the balancing of energy supply and demand in centrally planned economies the rate of development within developing countries including China the development and adoption of unconventional energy sources the adaptation of the world financial system to new situations These examples

highlight some of the continuing problems in the energy field These problems will be discussed in all sorts of meetings of all sorts of people in all sorts of places and through all forms of the communication media Other trends will materialize and take the centre of the stage often only for a short time

African Renaissance and Discourse Ownership in the Information Age Eric van Grasdorff, 2005 The information revolution is transforming the world especially the industrialised world But what are its implications for the implementation of an African renaissance Based on a Foucaultian analytical framework this book argues that the Internet has become a major Western instrument of domination in Africa By extending the reach of Western hegemonic discourses the Internet adds another dimension to Western discursive power However by allowing for the active participation in the process of naming the world the Internet also affords unprecedented means of transcending dependency

Historical Materialism and Globalisation Mark Rupert, Hazel Smith, 2016-04-29 Now that Soviet style socialism has collapsed upon itself and liberal capitalism offers itself as the natural necessary and absolute condition of human social life on a worldwide scale this book insists that the potentially emancipatory resources of a renewed and perhaps reconstructed historical materialism are more relevant in today's world than ever before Rather than viewing global capitalism as an elutable natural force these essays seek to show how a dialectic of power and resistance is at work in the contemporary global political economy producing and contesting new realities and creating conditions in which new forms of collective self determination become thinkable and materially possible It will be vital topical reading for anyone interested in international relations international political economy sociology and political theory

Comparative International Law Approaches for Optimizing Petro-Wealth in Nigeria: The Sustainable Development Pathway Dr. Onome Ejenavi, 2024-03-24 International and Comparative Law Approaches for Optimizing Petro Wealth in an SDGs Context and in harmony with sustainable development forms the core and subject of this book This book considers a beleaguered Nigerian oil industry and the pervasive contemporary struggles to sustain lucrative oil production in the 21st Century Currently Nigeria grapples with unrelenting and intractable challenges in its oil industry and apparently a plausible means of alleviating the extensive negative impacts of untenable oil exploitation patterns in the Niger delta have remained elusive From the foregoing the missing ingredient seems to be a dismal lack of sustainability endeavored approaches to guarantee a green petroleum industry economic growth and poverty eradication which remain vital considerations for a developing state like Nigeria Apparently the development that meets the needs of the present without compromising the interests options and indeed the needs of future generations summed up in the definition of sustainable development appears to be a maxim with minimal recognition or import in the Niger Delta which remains the hub of oil exploitation in Nigeria This book is thus motivated by the constantly evolving yet irrefutable implications arising from the concept of Sustainable Development and

how it can be realistically applied to oil and gas exploitation World Development Report 1988 ,1988 This is the eleventh report in the annual series assessing major development issues Part I reviews recent trends in the world economy and their implications for the future prospects of developing countries Part II examines the role of public finance in development This report includes the World Development Indicators which provide selected social and economic indicators for more than 100 countries Despite continued economic growth through 1987 and into 1988 two problems have characterized recent trends unsustainable economic imbalances within and among industrial countries and highly uneven economic growth among developing countries Part I of the report concludes that three interdependent policy challenges need to be addressed First industrial countries need to reduce their external payments imbalances Second developing countries need to continue restructuring their domestic economic policies in order to gain creditworthiness and growth Third net resource transfers external debt from the developing countries must be trimmed so that investment and growth can resume Part II of the report explores how public finance policies are best designed and implemented How deficits are reduced is crucial controlling costs in mobilizing revenues and setting careful priorities in public spending are equally important Efficiency in providing public services and expanding the scope for raising revenue can be achieved through decentralizing decisionmaking and reforming state owned enterprises with the latter permitting greater private participation **The Compromise of Liberal**

Environmentalism Steven F. Bernstein,2001 Available for the first time in English this is the definitive account of the practice of sexual slavery the Japanese military perpetrated during World War II by the researcher principally responsible for exposing the Japanese government s responsibility for these atrocities The large scale imprisonment and rape of thousands of women who were euphemistically called comfort women by the Japanese military first seized public attention in 1991 when three Korean women filed suit in a Toyko District Court stating that they had been forced into sexual servitude and demanding compensation Since then the comfort stations and their significance have been the subject of ongoing debate and intense activism in Japan much if it inspired by Yoshimi s investigations How large a role did the military and by extension the government play in setting up and administering these camps What type of compensation if any are the victimized women due These issues figure prominently in the current Japanese focus on public memory and arguments about the teaching and writing of history and are central to efforts to transform Japanese ways of remembering the war Yoshimi Yoshiaki provides a wealth of documentation and testimony to prove the existence of some 2 000 centers where as many as 200 000 Korean Filipina Taiwanese Indonesian Burmese Dutch Australian and some Japanese women were restrained for months and forced to engage in sexual activity with Japanese military personnel Many of the women were teenagers some as young as fourteen To date the Japanese government has neither admitted responsibility for creating the comfort station system nor given compensation directly to former comfort women This English edition updates the Japanese edition originally published in 1995 and includes introductions by both the author and the translator placing the story in context for American readers

The World Summit on Sustainable Development L. Hens, Bhaskar Nath, 2006-02-28 The Johannesburg Earth Summit which took place in the summer of 2002 confirmed the irreversible nature of the process that is founded upon the concept of Sustainable Development initially given form at Rio de Janeiro ten years earlier This process is to be welcomed while at the same time recognising the tremendous work that has taken place in converting this concept into a more concrete vision The Sustainable Development concept relates to every human activity covering the social economic and ecological dimensions which are often in conflict Consequently it is most important to include in research programmes some thought of the way people behave In theory the general elements of this inclusion are relatively easily defined However assessing the effects of one or another decision on all the interactions between the social economic and ecological dimensions involves significant difficulties All the more since we have to recognise in all modesty that humanity has not always excelled in the art of forward studies In fact the Precautionary Principle was introduced partly as a reaction to the sometimes blind confidence in technology and logic even if it is sometimes invoked in an exaggerated manner Nevertheless the duty to act for the sake of present and future generations is pressing Throughout history mankind has had to adapt and to innovate Now at the beginning of the 21 century the urgent need for such adaptations is obvious
