**Understanding Emergent Urbanism** Sotir Dharmo, 2021-08-31 The ideas presented in this book are a conceptual leverage to correct the rigidity of top down practices and bring the real city or the city of everyday life closer to the city of conventional planning Considering self organization as the starting point at the base of complex systems this book tries to understand how specific qualities emerge and evolve from

this behavior For this the book discusses new ways of looking at and understanding cities by applying holistic methods and approaches based on the conceptual grounds of quantum fractal and complexity theories The book highlights the fact that the information on how to transform and build a city is contained within the city itself In this regard some methodological steps to unpack complexities and translate the essential qualities of space into potential generators for city design and planning are provided The book urges courageous experimentation and proposes a methodology where the computational nature of urban phenomena goes along with historic anthropological ideas thus emphasizing the characteristics of a specific reality in a model They do not exclude each other in fact they are part of the unbroken web of wholeness Importantly the proposed methodology supports gradual and natural coevolution process in the city through combining planned and unplanned actions and the involving multiplicity of actors impacting on Urban Planning and Design Practice

**Informality through Sustainability** Antonino Di Raimo, Steffen Lehmann, Alessandro Melis, 2020-12-30 Informality through Sustainability explores the phenomenon of informality within urban settlements and aims to unravel the subtle links between informal settlements and sustainability Penetrating its global profile and considering urban informality through an understanding of local implications the authors collectively reveal specific correlations between sites and their local inhabitants The book opposes simplistic calls to legalise informal settlements or to view them as problems to be solved It comes at a time when common notions of informality are being increasingly challenged In 25 chapters the book presents contributions from well known scholars and practitioners whose theoretical or practical work addresses informality and sustainability at various levels from city planning and urban design to public space and architectural education Whilst previous studies on informal settlements have mainly focused on cases in developing countries approaching the topic through social cultural and material dimensions the book

explores the concept across a range of contexts including former Communist countries and those in the so called Global North Contributions also explore understandings of informality at various scalar levels region precinct neighbourhood and individual building Thus this work helps reposition informality as a relational concept at various scales of urbanisation This book will be of great benefit to planners architects researchers and policymakers interested in the interplay between informality and sustainability

**The Case for the Humanities** Eric Touya de Marenne,2016-12-01 Countering the perception that the humanities are unessential this volume contends that their well being has not only academic but also cultural political and existential ramifications Our technologically driven world possesses the means of its own destruction while economic and financial policies undermine the very existence of our democracy At the same time the postmodern and post human age fundamentally challenges our ability and legitimacy to conceive future ideals It is within this context that the humanities provide essential paths through which the teaching and knowledge of other academic fields such as STEM and economics must be re envisioned In short the humanities must be brought back to the center of academic life The political and pedagogical implications of this interdisciplinary study thus entail a renewed critique to rethink the relation between higher education society and the world at large politically

economically scientifically and technologically and the importance of the humanities within it At the heart of this reconsideration the humanities and humanity's fate and future become one      *Urban Geography* Tim Hall, Heather Barrett, 2018-01-03 This revised fifth edition not only examines the new geographical patterns forming within and between cities but also investigates the way geographers have sought to make sense of this urban transformation It is structured into three sections contexts themes and issues that move students from a foundation in urban geography through its major themes to contemporary and pressing issues The text critically synthesizes key literatures in the following areas the urban world changing approaches to urban geography urban form and structure economy and the city urban politics planning regeneration and urban policy cities and culture architecture and urban landscapes images of the city experiencing the city housing and residential segregation transport and mobility in cities sustainability and the city This edition builds on the success of the comprehensively revised fourth edition and provides revised chapters on transport mobility and urban futures with additional updating of readings and some case studies The book synthesises a wide range of literature on each subject and presents the material in a lively engaging way supported by an expanded range of student friendly features including exercises and suggestions for further study      *Human-Computer Interaction. Americas To overcome centuries of Eurocentrism Lara concludes will require a tremendous effort but nonetheless we have the responsibility of looking at the built environment of the Americas through our own lenses Spatial Theories for the Americas proposes a fundamental step in that direction **Getty Research Journal, No. 10** Gail Feigenbaum,2018-03-06 The Getty Research Journal features the work of art historians museum curators and conservators from around the world as part of the Getty s mission to promote critical thinking in the presentation conservation and interpretation of the world s artistic legacy Articles present original research related to the Getty s collections initiatives and research projects This issue features essays on the cross cultural features of a small alabaster vessel in the international style of the ancient Mediterranean French and Flemish influences in the Montebourg Psalter a new identification for the so called bust of Saint Cyricus the effects of the Reformation on the art market in northern Europe sketchbooks kept by the Portuguese painter Jo o Glama Stroeberle containing comments from his teachers the origins of the architectural history survey Japanese ink aesthetics in non ink media the impact of the invention of adhesive tape in the 1930s on the artistic process of abstract painters and the importance of ephemeral artifacts for the documentation of Carolee Schneemann s performance works Shorter texts include notices on an Egyptian ushabti from the tomb of Neferibresaneith a bronze statuette newly identified as representing the Alexandrian god Hermanubis and an etching by Felix Bracquemond commissioned by the Parisian gallery Arnold Tripp *White Supremacy, Settler Colonialism, Modernist Architecture, and Contemporary Preservation* Robert Flahive,2025-06-27 This book examines the afterlives of the built environment produced through early 20th century settler colonialism The author analyzes contemporary architectural preservationists narrative strategies to remake what were designed as racialized European zones in opposition to Indigenous zones as white cities through the documentation preservation and addition to the UNESCO World Heritage List This book interrogates the fashioning of white cities through ethnographic methods with local architectural preservationists and primary sources such as World Heritage Committee meeting notes and World Heritage List nomination files and inscription materials in the preservation of built form in Asmara Bras lia Casablanca Rabat and Tel Aviv The book is aimed at scholars and students interested in the politics of the built environment spatial politics urban studies architectural history international relations urban geopolitics settler colonialism international organizations and the politics of commemoration **Rethinking Global Modernism** Vikramaditya Prakash,Maristella Casciato,Daniel E.
