future List of acronyms Contractor reports (Re)Imagining Content-Area Literacy Instruction Roni Jo Draper, Paul Broomhead, Amy Peterson Jensen, Daniel Siebert, Jeffrey D. Nokes, 2015-04-18 Today's teachers need to prepare students for a world that places increasingly higher literacy demands on its citizens. In this timely book, the authors explore content area literacy and instruction in English, music, science, mathematics, social studies, visual arts, technology, and theatre. Each of the chapters has been written by teacher educators who are experts in their discipline. Their key recommendations reflect the aims and instructional frameworks unique to content area learning. This resource focuses on how literacy specialists and content area educators can combine their talents to teach all readers and writers in the middle and secondary school classroom. The text features vignettes from classroom practice with visuals to demonstrate, for example, how we read a painting or hear the discourse of a song. Additional contributors: Marta Adair, Diane L. Asay, Sharon R. Gray, Sirpa Grierson, Scott Hendrickson, Steven L. Shumway, Geoffrey A. Wright. Roni Jo Draper is an associate professor in the Department of Teacher Education in the David O. McKay School of Education. Paul Broomhead is associate professor and coordinator of the Music Education Division in the School of Music. Amy Petersen Jensen is an associate professor in the College of Fine Arts and Communications. Jeffery D. Nokes is an assistant professor in the History Department. Daniel Siebert is an associate professor in the Department of Mathematics Education. All editors are at Brigham Young University, Utah. This is a must read for educators engaged in professional development efforts aimed at improving students' learning across the content areas. The editors and chapter authors are to be applauded for taking up the call to place content area literacy squarely in the disciplines. From the Foreword by Thomas W. Bean, University of Nevada, Las Vegas. A great tool for developing disciplinary literacy. Douglas Fisher, San Diego State University. Draper and her colleagues successfully convey the complex and subject specific nature of effective content area literacy instruction. This book reminds us in refreshing ways that there is more to effective reading than decoding and prior knowledge. George G. Hruby, Executive Director, Collaborative Center for Literacy Development, University of Kentucky. From its grounding in inquiry and collaboration to its contemporary views of literacy and text, this book is an important response to recent calls to redress century-old recommendations for teaching reading. It is exciting to recommend *Re-Imagining Content Area Literacy Instruction* for any course or in-service project with a focus on content area literacy instruction. Kathleen Hinchman, Syracuse University School of Education.

Teacher's Guide to Educational Assessment Iasonas Lamprianou, James A. Athanasou, 2009-01-01 This book is a natural step beyond our earlier text *A Teacher's Guide to Assessment* which was published almost six years ago. The purpose of this book is to offer a straightforward guide to educational assessment for teachers at all levels of education, including trainers and instructors. The scope of this book is wider, however, and the targeted audience is broader than the first edition. It is designed to address the needs not only of those taking a first course in educational assessment and measurement but it can also

usefully serve students at the post graduate level as well as experienced teachers trainers and instructors who would like to update their knowledge and acquire practical skills using relevant quantitative methods The book is appropriate for an international audience In this revised edition we have added new and important material which covers the assessment arrangements necessary for people with special needs and the use of technology for assessment purposes We have elaborated on the dangers of differential item functioning we have extended the Rasch measurement material and enriched the book with practical examples using Microsoft Excel The main message of the book is that assessment is not based on commonsense but on a huge body of international research and application over many years Testing is a powerful vital and large part of a teacher s assessment arsenal because it can be practical structured and very informative The correct use of testing either in its traditional paper and pencil form or in its modern technology based style can be a formidable ally for every teacher who aspires to practise evidence based teaching and learning
