Elementary Statistics Using SAS Sandra D.

Schlotzhauer, 2015-04-17 Bridging the gap between statistics texts and SAS documentation Elementary Statistics Using SAS is written for those who want to perform analyses to solve problems The first section of the book explains the basics of SAS data sets and shows how to use SAS for descriptive statistics and graphs The second section discusses fundamental statistical concepts including normality and hypothesis testing The remaining sections of the book show analyses for comparing two groups comparing multiple groups fitting regression equations and exploring contingency tables For each analysis author Sandra Schlotzhauer explains assumptions statistical approach and SAS methods and syntax and makes conclusions from the results Statistical methods covered include two sample t tests paired difference t tests analysis of variance multiple comparison techniques regression regression diagnostics and chi square tests Elementary Statistics Using SAS is a thoroughly revised and updated edition of Ramon Littell and Sandra Schlotzhauer's SAS System for Elementary Statistical Analysis Oceanographic Analysis with R Dan E. Kelley, 2018-10-17 This book presents the R software environment as a

key tool for oceanographic computations and provides a rationale for using R over the more widely used tools of the field such as MATLAB Kelley provides a general introduction to R before introducing the oce package This package greatly simplifies oceanographic analysis by handling the details of discipline specific file formats calculations and plots Designed for real world application and developed with open source protocols oce supports a broad range of practical work Generic

functions take care of general operations such as subsetting and plotting data while specialized functions address more specific tasks such as tidal decomposition hydrographic analysis and ADCP coordinate transformation In addition the package makes it easy to document work because its functions automatically update processing logs stored within its data objects Kelley teaches key R functions using classic examples from the history of oceanography specifically the work of Alfred Redfield Gordon Riley J Tuzo Wilson and Walter Munk Acknowledging the pervasive popularity of MATLAB the book provides advice to users who would like to switch to R Including a suite of real life applications and over 100 exercises and solutions the treatment is ideal for oceanographers technicians and students who want to add R to their list of tools for oceanographic analysis

Using Statistics in Small-Scale Language Education Research Jean L. Turner, 2014-02-18 Assuming no familiarity with statistical methods this text for language education research methods and statistics courses provides detailed guidance and instruction on principles of designing conducting interpreting reading and evaluating statistical research done in classroom settings or with a small number of participants While three different types of statistics are addressed descriptive parametric non parametric the emphasis is on non parametric statistics because they are appropriate when the number of participants is small and the conditions for use of parametric statistics are not satisfied The emphasis on non parametric statistics is unique and complements the growing interest among second and foreign language educators in doing statistical research in classrooms Designed to help students and other language education researchers to identify and use analyses that are appropriate for their studies taking into account the number of participants and the shape of the data distribution the text includes sample studies to illustrate the important points in each chapter and exercises to promote understanding of the concepts and the development of practical research skills Mathematical operations are explained in detail and step by step illustrations in the use of R a very powerful online freeware program to perform all calculations are provided A Companion Website extends and enhances the text with PowerPoint presentations illustrating how to carry out calculations and use R practice exercises with answer keys data sets in Excel MS DOS format and quiz midterm and final problems with answer keys
