Statue Of Liberty Craft For Second Grade:

Mathematics in the K-8 Classroom and Library Sueanne McKinney, KaaVonia Hinton, 2010-05-11 Two experts on education offer a rich and diverse selection of children's literature and teaching strategies for the K-8 mathematics classroom. Taking advantage of quality motivating literature during mathematics instruction pays off especially when teachers and media specialists work together to convey crucial mathematical concepts and standards. *Mathematics in the K-8 Classroom and Library* shows you how it's done. After an introduction to the National Council of Teachers of Mathematics's NCTM Principles and Process Standards, each remaining chapter is devoted to an NCTM content standard. The book offers engaging research-based strategies and booklists of specific titles that together can be used to increase student achievement. The strategies suggested here provide a hands-on, student-centered focus that allows students to make connections with prior learning, personal experiences, and good books. Both the recommended children's books and the activities will appeal even to reluctant readers and students for whom mathematics might be a challenge. Each chapter includes an extensive annotated list of texts, dozens of hands-on activities, handouts, and writing prompts.

Using Children's Literature in Math and Science, 1997 **ENC Focus**, 1994 **Young Citizens of the World** Marilynne Boyle-Baise, Jack Zevin, 2009-03-03 This text takes a clear stance. Social studies is about citizenship education; citizenship not only as a noun but as a verb: something one DOES. Based on this clear curricular and pedagogical purpose, it lays out a holistic and multicultural three-part process for civic preparation: becoming informed, thinking it through, and taking action. Six outstanding teaching strategies and teaching-learning projects throughout bring this framework to life.

Teaching Strategies - Grades 3-4. Master Curriculum Guide in Economics. Teacher Resource Manual [and] Student Activities Cynthia Lieb, Cynthia Samuel, Robert Lee Stout, 1994 This teacher resource manual for 3rd and 4th grade students uses a wide variety of instructional activities for teaching economics education. The activities include role playing in small groups, producing bookmarks, and making decisions. Students are given the opportunity to interview adults, perform services for their families, do independent research, conduct experiments, and perform in skits. As a class, they participate in a trading activity, engage in a classroom competition, and take part in a simulation. Discussion, reading, and writing clarify and reinforce the concepts that the activities are designed to teach. The manual contains 15 step-by-step lesson plans and reductions of the student pages for quick reference. Performance outcomes, a planning chart, and a 57-term glossary also are included. The companion student activities manual contains 39 supporting activities. The pages include family letters, scripts, activity cards, patterns, and a variety of other classroom materials in blackline master form.
