Teaching History, 2000 **Navigating World History** P. Manning, 2003-05-15. World history has expanded dramatically in recent years, primarily as a teaching field and increasingly as a research field. Growing numbers of teachers and Ph.D.s in history are required to teach the subject. Snider,2011-02-08 Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions especially in the realms of culture and economy Still the region cannot escape from the burden of history This book examines the formation of historical memory in four Northeast Asian societies China Japan South Korea and Taiwan and the United States focusing on the period from the beginning of the Sino Japanese war in 1931 until the formal conclusion of the Pacific War with the San

Francisco Peace Treaty of 1951 The contributors analyse the recent efforts of Korean Japanese and Chinese scholars to write a common history of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements In doing so they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided and often conflicting historical memories The book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives Through uncovering the existence of different master narratives it is hoped citizens will develop a more self critical self reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self and mutual understanding and eventual historical reconciliation in the region This book will be essential reading for students and scholars of Asian history Asian education and international relations in East Asia *Childhood in World History* Peter N. Stearns, 2016-07-01 Taking a global look at what the category of childhood has meant from agricultural societies to the present day *Childhood in World History* offers a vital overview of this topical field Through comparative analysis Peter Stearns facilitates a cross cultural and transnational understanding of attitudes towards the role of children in society and how models of childhood have developed throughout history Engaging with issues around children s role in the family and the involvement of communal national educational and global infrastructures Stearns unpacks the experience of childhood in the West Asia Latin America and Africa This expanded and updated third edition includes updated bibliographies and suggested readings expanded discussions of religion and children s rights a new chapter on families in developing economies in the early twentieth century broadened discussions of childhood in Japan and in communist countries With expanded further reading lists Stearns s accessible text not only provides an overview of its field but also offers a research guide for more specialized study Concisely presented but broad in scope Stearns s accessible text guides readers through the transformations of the concept of childhood **The Industrial Revolution in World History** Peter N Stearns, 2007 Offering a genuine historical approach this looks at the international factors that sparked the industrial revolution at its global spread and impact and seeks to build on recent scholarly advances to include a fully international human perspective to our understanding of the industrial revolution Teaching History Today Mark Newman, 2024-02-14 The methods of teaching history in grades 6 12 have changed over the last few years to be more interactive and collaborative More and more teaching and learning revolves around an essential triad of inquiry primary sources and literacy in a collaborative classroom environment *Teaching History Today* is about placing inquiry primary sources and literacy foundations of history instruction front and center in the education of preservice history teacher candidates and in service classroom history teachers By focusing on these major components of teaching and learning readers can learn how to organize the massive amount of historical content into effective units They can see how to integrate the learning of content with the development of skills And they can gain expertise into how and why to engage students collaboratively in the learning process *The Trouble*
