The Bigness Complex Walter Adams, James W. Brock, 1986 The Bigness Complex confronts head on the myth that organizational giantism leads to economic efficiency and well being in the modern age. On the contrary it demonstrates how bigness undermines our economic productivity and progress endangers our democratic freedoms and exacerbates our economic problems and challenges. This new edition has a thoroughly updated variety of issues examples and new developments including government bailouts of the airline industry regulation of biotechnology the fiasco of recent electricity deregulation and mergers and consolidations in oil radio and grocery retailing. The analysis is framed in the timeless context of American distrust of concentrations of power. The authors show how both the left and the right fail to address the central problem of power in formulating their diagnoses and recommendations. The book concludes with an alternative public philosophy as a viable guidepost for public policy toward business in a free enterprise democracy.

The Dog Bone Portfolio Margret Kopala, John Budden, 2015-06-01 Like so many of us Margret Kopala lost a significant portion of her life savings in the stock market crash of 2008. Unlike us however she went on a long and intense financial odyssey to find out what caused the losses and what she could do to protect herself in the future. Armed with her skills as a journalist and public policy analyst fueled by equal measures of fear and determination and mentored by successful investment strategist and financial broadcaster John Budden Kopala researched and wrote this magisterial analysis of how Russian economist Nikolai Kondratieff's long wave theory is playing out in what many today describe as a financial Winter. Along the way she is introduced to financial experts familiar with Kondratieff scholarship. John Budden's interviews in the book with Dean LeBaron J. Anthony Boeckh Ian Gordon Larry Jeddelloh Don Lindsey the late Lord William Rees Mogg Jim Rogers Eric Sprott and Ronald Peter St ferle show how investors must put a new spin on asset allocation and security of their assets. Like a dog that buries bones in different places we would be advised to allocate our assets to different parts of the world and to ensure that a good portion of those assets include gold the only continuous basis of wealth across history and around the world. Kopala explores the global national and personal effects of overconsumption underproduction energy and innovation the printing of money to save the economy competitive devaluations deflation reflation and inflation and war the ultimate economic crisis. She documents those technologies that seeded previous New

Economy Spring seasons from the era of canals to those of railroads automobiles and infotech and probes today s innovations most likely to seed the Next New Economy that we desperately need if we are to escape the doldrums of the current financial Winter With trenchant explanations of how individuals can achieve portfolio strength by first preserving capital then being vigilant about the financial effects of politics economic theory culture and our own choices *The Dog Bone Portfolio* is a gift to investors policy makers and ultimately nations everywhere

Let the Wind blow: Physics of Wave and Only Wave

Victor Christianto, Florentin Smarandache, 2018 In this book we try to make our case through examples in different fields of science including missiology ecclesiology 10 and also medicine and economics theorizing We try to be almost everything for everyone while keep being humble as two unprofitable servants That way we would quote the title of Borges short story Everything and nothing

Low-Frequency Waves in Space Plasmas Andreas Keiling, Dong-Hun Lee, Valery Nakariakov, 2016-02-10 Low frequency waves in space plasmas have been studied for several decades and our knowledge gain has been incremental with several paradigm changing leaps forward In our solar system such waves occur in the ionospheres and magnetospheres of planets and around our Moon They occur in the solar wind and more recently they have been confirmed in the Sun s atmosphere as well The goal of wave research is to understand their generation their propagation and their interaction with the surrounding plasma *Low frequency Waves in Space Plasmas* presents a concise and authoritative up to date look on where wave research stands What have we learned in the last decade What are unanswered questions While in the past waves in different astrophysical plasmas have been largely treated in separate books the unique feature of this monograph is that it covers waves in many plasma regions including Waves in geospace including ionosphere and magnetosphere Waves in planetary magnetospheres Waves at the Moon Waves in the solar wind Waves in the solar atmosphere Because of the breadth of topics covered this volume should appeal to a broad community of space scientists and students and it should also be of interest to astronomers astrophysicists who are studying space plasmas beyond our Solar System

Naval Eyewitnesses James Goulty, 2022-11-04 Goulty tells the story from the perspective of the ordinary sailor or officer who was there *The Northern Mariner* Although many books have been written about naval actions during the Second World War histories and memoirs in particular few books have attempted to encompass the extraordinary variety of the experience of the war at sea That is why James Goulty s vivid survey is of such value Sailors in the Royal Navy and the Merchant Navy experienced a war fought on a massive scale on every ocean of the world in a diverse range of vessels from battleships aircraft carriers and submarines to merchant ships and fishing boats Their recollections are as varied as the ships they served in and they take the reader through the entire maritime war as it was perceived at the time by those who had direct personal knowledge of it Throughout the book the emphasis is on the experience of individuals their recruitment and training their expectations and the reality they encountered on active service in many different offensive and defensive roles including convoy duty and coastal defence amphibious operations hunting U boats and surface raiders mine

sweeping and manning landing and rescue craft A particularly graphic section describes in the words of the sailors themselves what action against the enemy felt like and the impact of casualties seamen who were wounded or killed on board or were lost when their ships sank A fascinating inside view of the maritime warfare emerges which may be less heroic than the image created by some post war accounts but it gives readers today a much more realistic impression of the whole gamut of wartime life at sea
