Urban Governance And Community Resilience Guides

Gabrielle Iglesias

Urban Governance And Community Resilience Guides:

Urban Governance and Community Resilience Guides, 2010 **Urban Governance and Community Resilience Guides** Gabrielle Iglesias, 2010

Resilience and Urban Governance Katarína Svitková, 2021-07-22 This book challenges the concept of urban resilience by exploring its impact and limitations in three cities Resilience has become a buzzword in science industry and policy and this volume offers a fresh perspective on urban resilience as a regulatory and constitutive principle of governance in cities Cities constitute an extremely relevant playground for resilience as they are exposed to various disruptions from natural disasters and pandemics to political conflicts and terrorism This book traces the evolution of urban resilience from international development organizations to local governments and communities It explores how this concept was adopted and mobilized by different actors for different purposes and analyses the resulting resilience momentum in Barcelona San Francisco and Santiago The book outlines the extent to which resilience has become a universal policy tool and a desired end state despite its clearly problematic definition It also contributes to the discussion about contemporary governance safety and security in times when their very nature and feasibility are being questioned This book will be of much interest to students of resilience studies urban studies development studies human geography and international relations *Urban Governance and*

Community Resilience Guides Gabrielle Iglesias, 2010 Urban Governance and Community Resilience Guides Gabrielle Iglesias, 2010 **Cities and Flooding** Abhas K. Jha, Robin Bloch, Jessica Lamond, 2012-02-01 Urban flooding is an increasing

challenge today to the expanding cities and towns of developing countries This Handbook is a state of the art user friendly operational guide that shows decision makers and specialists how to effectively manage the risk of floods in rapidly urbanizing settings and within the context of a changing climate **Flood Handbook** Saeid Eslamian, Faezeh A.

Eslamian, 2022-04-18 Floods are difficult to prevent but can be managed in order to reduce their environmental social cultural and economic impacts Flooding poses a serious threat to life and property and therefore it is very important that flood risks be taken into account during any planning process This handbook presents different aspects of flooding in the context of a changing climate and across various geographical locations Written by experts from around the world it examines flooding in various climates and landscapes taking into account environmental ecological hydrological and geomorphic factors and considers urban agriculture rangeland forest coastal and desert areas Features Presents the main principles and applications of the science of floods including engineering and technology natural science as well as sociological implications Examines flooding in various climates and diverse landscapes taking into account environmental ecological hydrological and geomorphic factors Considers floods in urban agriculture rangeland forest coastal and desert areas Covers flood control structures as well as preparedness and response methods Written in a global context by contributors from around the world Flood Recovery, Innovation and Response III D. Proverbs, 2012 Flooding claims many

lives worldwide each year In addition many more lives are affected by homelessness disease and crop failures as a result of floods destructiveness The number of recent flood events coupled with climate change predictions and urban development suggest that these statistics are likely to worsen in the future Flooding in populated areas can cause substantial property damage as well as threaten human life Apart from the obvious physical damage to buildings contents and loss of life there are other more indirect losses that are often overlooked These intangible impacts are generally associated with disruption to normal life as well as longer term health issues including stress related illness The conference papers cover the following topics Flood risk analysis Flood risk management Urban flood management Flood forecasting Risk assessment and decision making Flood case studies Community resilience to flooding Energy preparedness and response Critical infrastructure protection Flood consequence assessment

Climate Health Risks in Megacities Cesar Marolla, 2016-12-01 Climate Health Risks in Megacities Sustainable Management and Strategic Planning courageously confronts the immense challenges of alleviating climate change and takes the initiative to layout an agenda that calls for action in the rapidly changing landscape of our global climate This guide provides a constructive methodology for developing and implementing risk management and operational continuity management systems to climate change effects on urban populations It addresses key issues such as physical location proper sanitation food security and vector borne diseases against the backdrop of climate change and then model its effect on the urban dwellers The author also reveals the benefits of implementing a unique risk management approach to combat global threats and focuses on building urban resilience in the face of disasters Prepared with a comprehensive and forward thinking style this book draws on indispensable case studies in key megacities like New York Los Angeles Beijing Rio de Janeiro London Mumbai and Lagos and links researchers scientists city s mayors environmentalists policy makers and world leaders from central areas to review reflect and expound on future directions

Renewing Local Planning to Face Climate Change in the Tropics Maurizio Tiepolo, Alessandro Pezzoli, Vieri Tarchiani, 2017-07-05 This book is open access under a CC BY 4.0 license This book aims to inspire decision makers and practitioners to change their approach to climate planning in the tropics through the application of modern technologies for characterizing local climate and tracking vulnerability and risk and using decision making tools Drawing on 16 case studies conducted mainly in the Caribbean Central America Western and Eastern Africa and South East Asia it is shown how successful integration of traditional and modern knowledge can enhance disaster risk reduction and adaptation to climate change in the tropics The case studies encompass both rural and urban settings and cover different scales rural communities cities and regions In addition the book looks to the future of planning by addressing topics of major importance including residual risk integration in local development plans damage insurance and the potential role of climate vulnerability reduction credits In many regions of the tropics climate planning is growing but has still very low quality This book identifies the weaknesses and proposes effective solutions

Land Issues for Urban Governance in Sub-Saharan Africa Robert

Home,2020-11-11 Sub Saharan Africa faces many development challenges such as its size and diversity rapid urban population growth history of colonial exploitation fragile states and conflicts over land and natural resources This collection contributed from different academic disciplines and professions seeks to support the UN Habitat New Urban Agenda passed at Habitat III in Quito Ecuador in 2016 It will attract readers from urban specialisms in law geography and other social sciences and from professionals and policy makers concerned with land use planning surveying and governance Among the topics addressed by the book are challenges to governance institutions how international development is delivered building land management capacity funding for urban infrastructure land based finance ineffective planning regulation and the role of alternatives to courts in resolving boundary and other land disputes Issues of rights and land titling are explored from perspectives of human rights law the right to development and women s rights of access to land and land tenure regularization Particular challenges of housing planning and informality are addressed through contributions on international real estate investment community participation in urban settlement upgrading housing delivery as a partly failing project to remedy apartheid s legacy and complex interactions between political power money and land Infrastructure challenges are approached in studies of food security and food systems urban resilience against natural and man made disasters and informal public transport **Building Urban Resilience** Abhas K. Jha,Todd W. Miner,Zuzana Stanton-Geddes,2013-03-01

This handbook is a resource for enhancing disaster resilience in urban areas It summarizes the guiding principles tools and practices in key economic sectors that can facilitate incorporation of resilience concepts into decisions about infrastructure investments and urban management that are integral to reducing disaster and climate risks Routledge Handbook of Sustainable and Resilient Infrastructure Paolo Gardoni,2018-12-17 To best serve current and future generations infrastructure needs to be resilient to the changing world while using limited resources in a sustainable manner Research on and funding towards sustainability and resilience are growing rapidly and significant research is being carried out at a number of institutions and centers worldwide This handbook brings together current research on sustainable and resilient infrastructure and in particular stresses the fundamental nexus between sustainability and resilience It aims to coalesce work from a large and diverse group of contributors across a wide range of disciplines including engineering technology and informatics urban planning public policy economics and finance Not only does it present a theoretical formulation of sustainability and resilience but it also demonstrates how these ideals can be realized in practice This work will provide a reference text to students and scholars of a number of disciplines **Environmentally Sustainable and Socially**

Resilient Urban Development and Management Anand Achari,Harshad Bhatia,Anil Nagrath,Nitin Liladhar Rane,Chaitanya Baliram Pande,2025-09-26 This book is an extensive guide that covers topics related to building sustainable and resilient urban environments The book delves into crucial issues such as energy efficiency air quality climate change mitigation and adaptation solid waste management transportation water balance and flood control This book is mainly
