Potts,2014-03-03 The classic images of Iranian nomads in circulation today and in years past suggest that Western awareness of nomadism is a phenomenon of considerable antiquity Though nomadism has certainly been a key feature of Iranian history it has not been in the way most modern archaeologists have envisaged it Nomadism in Iran recasts our understanding of this timeless tradition Far from constituting a natural adaptation on the Iranian Plateau nomadism is a comparatively late introduction which can only be understood within the context of certain political circumstances Since the early Holocene most if not all agricultural communities in Iran had kept herds of sheep and goat but the communities themselves were sedentary only a few of their members were required to move with the herds seasonally Though the arrival of Iranian speaking groups attested in written sources beginning in the time of Herodotus began to change the demography of the plateau it wasn't until later in the eleventh century that an influx of Turkic speaking Oghuz nomadic groups true nomads of the steppe began the modification of the demography of the Iranian Plateau that accelerated with the Mongol conquest The massive unprecedented violence of this invasion effected the widespread distribution of largely Turkic speaking nomadic groups across Iran Thus what has been interpreted in the past as an enduring pattern of nomadic land use is by archaeological standards very recent Iran's demographic profile since the eleventh century AD and more particularly in the nineteenth and twentieth century has been used by some scholars as a proxy for ancient social organization Nomadism in Iran argues that this modernist perspective distorts the historical reality of the land Assembling a wealth of material in several languages and disciplines Nomadism in Iran will be invaluable to archaeologists anthropologists and historians of the Middle East and Central Asia

[T]axing Greenhouse Gases Lex Fullarton,2019-03-30 Lex Fullarton takes a closer look at the three pillars of the sustainable development framework known as the Triple Bottom Line TBL The concept of the TBL is that for a project to be sustainable it must not simply be profitable in economic terms but it must also benefit society and enhance the natural environment In the 21st century the greatest threat to Earth's natural environment and the population of the planet is the rise of greenhouse gas emissions caused from burning fossil fuel as an energy source The rise of GHG emissions has resulted in a rise in the ambient air temperature of the Earth's atmosphere and is resulting in a significant change in climatic conditions on Earth Fullarton scrutinizes the problem of getting industry and governments to understand the significance of creating harmony within the TBL One of the main problems is that partisan politics tends to fragment the factors of the TBL rather than bring them together Fullarton takes a strong stand in suggesting that taxation systems which have traditionally been viewed primarily as a means of raising

government finance can be effectively applied to influence industrial and consumer attitudes towards transiting away from polluting fossil fuel energy sources towards non polluting renewable energy use
