Defining Student Success Lisa M. Nunn, 2014-04-15 The key to success our culture tells us is a combination of talent and hard work Why then do high schools that supposedly subscribe to this view send students to college at such dramatically different rates Why do students from one school succeed while students from another struggle To the usual answer an imbalance in resources this book adds a far more subtle and complicated explanation Defining Student Success shows how different schools foster dissimilar and sometimes conflicting ideas about what it takes to succeed ideas that do more to preserve the status quo than to promote upward mobility Lisa Nunn s study of three public high schools reveals how students beliefs about their own success are shaped by their particular school environment and reinforced by curriculum and teaching practices While American culture broadly defines success as a product of hard work or talent at school intelligence is the talent that matters most Nunn shows that each school refines and adapts this American cultural wisdom in its own distinct way reflecting the sensibilities and concerns of the people who inhabit each school While one school fosters the belief that effort is all it takes to succeed another fosters the belief that hard work will only get you so far because you have to be smart enough to master course concepts Ultimately Nunn argues that these school level adaptations of cultural ideas about success become invisible advantages and disadvantages for students college going futures Some schools definitions of success match seamlessly with elite college admissions definition of the ideal college applicant while others more closely align with the expectations of middle or low tier institutions of higher education With its insights into the transmission of ideas of success from society to school to student this provocative work should prompt a reevaluation of the culture of secondary education Only with a thorough understanding of this process will we ever find more consistent means of inculcating success by any measure Resources in Education ,1985 History Robert Blackey, 2011-02-01 This book includes 14 essays written by the author that provide practical advice for teachers and students to assist both in achieving the best results for teaching learning and writing about history Part 1 offers suggestions for enlivening classroom presentations Part 2 addresses the problems of teaching students to write and part 2 focuses on history tests and exams including ways to construct and respond to essay questions **Reader's Index and Guide** ,1913 **CliffsTestPrep NYSTCE: Multi-Subject Content Specialty Test (CST)** American BookWorks Corporation, 2011-11-30 Your guide to a higher score on the NYSTCE Why CliffsTestPrep Guides Go with the name you know and trust Get the information you need fast Written by test prep specialists About the contents Introduction Overview of the test Tips for answering multiple choice questions Part I Subject Review Focused reviews cover all subjects tested including English Language Arts Mathematics Science and Technology Social Studies The Fine Arts Health and Fitness Family and Consumer Science and Career Development Foundations of Reading Constructed Response Assignment Subareas focus on specific skills within the subjects Questions within the review sections emphasize key concepts and skills Part II Two Full Length Practice Tests Practice tests are structured like the actual test
