country and the implications of China's LTCI reform for other countries. The book will be a useful reference to scholars and policy makers who look at urban ageing and healthcare costs and delivery. **Advanced Age Geriatric Care** Nages Nagaratnam, Kujan Nagaratnam, Gary Cheuk, 2018-11-26. As the Baby Boomers age, concerns over healthcare systems' abilities to accommodate geriatric patients grow increasingly challenging. This is especially true with the population deemed to be the oldest of the old, specifically those over the age of 85. Unlike any other time in history, this demographic is the fastest growing segment of most developed countries. In the United States, the oldest old is projected to double from 4.3 million to 9.6 million by 2030. The increased life expectancy of the population since the early 1900s has been built on the improvement of living conditions, diet, public health, and advancement in medical care. With this, we have seen a steady decline in the age-specific prevalence of vascular and heart diseases, stroke, and even dementia. Older persons are healthier today than their counterparts decades ago. More importantly, than in any other age group, the care of the oldest old must be individualized. Management decisions should be made taking into consideration the older persons' expressed wishes, quality of life, function, and mental capacity. The inevitable consequence is that there will be an increase in the prevalence of older persons with chronic diseases, multiple co-existing pathologies, and neurodegenerative diseases. The oldest of the aging population are often excluded from drug trials, and their treatments are largely based on findings extrapolated from that of the younger old. Furthermore, among the oldest old, physiologically, they are more diverse than other segments of the population. Their demographic characteristics are unparalleled and different compared to that of the younger old. Several studies have drawn attention to the differing attitudes among health professionals towards elderly people, and many show prejudice because they are old. As a result, the use of age as a criteria in determining the appropriateness of treatment is of very limited validity, yet there are limited resources that guide physicians through these challenges. This book creates a greater awareness of these challenges and offers practical guidelines for working within the infrastructures vital to this demographic. This book is designed for geriatricians, primary care physicians, junior medical officers, specialty geriatrics nurses, and gerontologists. It is divided into 3 sections: General Considerations, Chronic diseases, and Geriatric Syndromes. Each chapter provides a summary of important and essential information under the heading of Key Points. Case studies are included in some of the chapters to highlight the principles of management. **African Americans in Higher Education** James L. Conyers, Crystal L. Edwards, Kevin B. Thompson, 2020-07-17. While there is a wealth of scholarship on African American Education, no single volume has examined the roles of such important topics as Black Male Identity, Hip Hop Culture, Adult Learners, Leadership at Historically Black Colleges and Universities, Critical Black Pedagogy, among others. This book critically examines African Americans in higher education with an emphasis on the social and philosophical foundations of African American culture. This is a critical interdisciplinary study, one which explores the collection, interpretation, and analysis of quantitative and qualitative data in the field of higher education. To date, there are not any single authored or edited collections that attempt to research

the logical and conceptual ideas of the disciplinary matrix of Africana social and philosophical foundations of African Americans in higher education Therefore this volume provides readers with a compilation of literary historical philosophical and communicative essays that describe and evaluate the Black experience from an Afrocentric perspective for the first time It is required reading in a wide range of African American Studies courses Perfect for courses such as African American Social and Philosophical Foundations African American Studies African Nationalist Thought History of Black Education
