Before You Read

In this lesson, you will read about how and why we study history.

As You Read

Use a diagram to organize the lesson's main ideas and details.

GEOGRAPHY

How does geography affect how a civilization develops?

The people who study history are also the people who write about history. They piece together the information they find in order to understand people from the past. Their field of study is called **historiography**.

Social scientists also use geography to study history. The book *Guns, Germs, and Steel* looks at how geography helped and hurt civilizations in the past. Jared Diamond, the book's author, explained the three factors that helped Eurasian civilizations succeed: good temperatures and locations for agriculture, resistance to certain deadly germs, and the ability to develop technology.

Where a group of people settle can affect how, when, and in what way they

develop. The island nation of Japan was very isolated from the West before the mid-1800s. By the early 1900s, Japanese people were trading with the West and the country was considered a world power. Great Britain, also an island nation, developed much earlier. Britain was part of the Roman Empire. It later joined other European countries to start colonies around the world. The British had to develop a strong navy in order to protect its own empire around the globe.

1. Why did Japan develop later than Great Britain?

Congregations through Community Boyung Lee,2013-11-04 In this helpful book Boyung Lee offers an encouraging vision of the mainline church s future Lee grapples with some of the greatest challenges facing the mainline church offering compelling responses to recurring questions What does faithfulness to the gospel look like in this changing world What is our distinctive voice in the larger society How does theological education have to change if it is to serve the needs of a new century Lee argues that the church s future is a promising one if the church can offer a richer and deeper definition of community one that moves beyond the excessive individualism of western culture and that helps mainline Christians understand their solidarity with one another and with all of God s people Lee further explores the crucial role of faith formation at the congregational and seminary levels More than mere schooling theological education must engage all aspects of educators and students lives to prepare seminarians for the challenges that lie ahead While not dismissing the mainline church s challenges Lee offers congregational leaders and seminary educators a vision of a church transformed for the 21st century
