The Twentieth-Century World, 1914 to the Present

John C. Corbally,2018-10-04 The Twentieth Century World 1914 to the Present introduces students to five distinct historical themes in 20th century history politics economics religion technology and the environment Each of these themes is set in a social and cultural history framework that emphasizes the commonalities and diversity in human experiences throughout the recent era This is a genuinely global textbook that takes a non nationalistic approach to history and attempts to avoid marginalising the role of non western actors and societies John Corbally explores the connections interactions and exploitations of global resources and peoples that were part and parcel of 20th century history Economically the book shows how people were connected by the spread of global capitalism and communism It explores the spread of traditional religions and philosophies all over the globe as well as looking at secular challenges It also considers how technology reached further into people s lives Ideal for undergraduate level students of 20th century history this is a book that offers a balanced multi perspective approach to recent global history helping the 21st century student understand today s world and interrogate commonly held assumptions about its history

Rethinking History, Dictatorship and War Claus-Christian

Szejnmann,2009-01-01 **How to Meet Standards, Motivate Students, and Still Enjoy Teaching!** Barbara P.

Benson,2003 How to Meet Standards Motivate Students and Still Enjoy Teaching is a truly outstanding practical resource that should be in every educator s professional library It succeeds beautifully with the complex challenge of defining a classroom in which standards come alive for teachers and students in a doable manner From the Foreword by Spence Rogers Founder and Director Peak Learning Sysems Most states in the USA have adopted some form of standards and accountability into their systems but few teachers understand how to model their classrooms to prepare their students to thrive in this new educational environment In this book the author offers teachers the tools they need to build the standards based classroom Rather than throwing away all their valuable techniques and experience teachers learn to synthesize the best of what they already know and do with current and emerging research on learning and learners The four components of the standards based classroom will help teachers plan lessons assess student work and create a community of learning that meets the standards that have been set for their students

Precious Metal

Peter H. Christensen,2022-11-17 With its incorporation into architecture on a grand scale during the long nineteenth century steel forever changed the way we perceive and inhabit buildings In this book Peter H Christensen shows that even as architects and engineers were harnessing steel s incredible properties steel itself was busy transforming the natural world Precious Metal explores this quintessentially modernist material not for the heroic structural innovations it facilitated but for a deeper understanding of the role it played in the steady change of the earth Focusing on the formative years of the architectural steel economy and on the corporate history of German steel titans Krupp and Thyssen Christensen investigates the ecological interrelationship of artificial and natural

habitats mediated by steel He traces steel through six distinct phases birth formation display dispersal construction and return By following the life of steel from the collection of raw minerals to the distribution and disposal of finished products Christensen challenges the traditional narrative that steel was simply the primary material responsible for architectural modernism Based on the premise that building materials are as much a part of the natural world as they are of a building this groundbreaking book rewrites an important chapter of architectural history It will be welcomed by specialists in architectural history nineteenth century studies environmental history German studies modernist studies and the Anthropocene

Blood and Water David Gilmartin, 2015-06-05 The book is a history of the political and environmental transformation of the Indus basin as a result of the modern construction of the world's largest integrated irrigation system Begun under British colonial rule in the 19th century this transformation continued after the region was divided between two new states India and Pakistan in 1947 Massive irrigation works have turned an arid region into one of dense agricultural population but its political legacies continue to shape the politics and statecraft of the region Provided by publisher

The Outline of Knowledge: The history of the world James Albert Richards, 1924

Europe and the British Geographical Imagination, 1760-1830 Paul Stock, 2019-10-03 Europe and the British Geographical Imagination 1760 1830 explores what literate British people understood by the word Europe in the late eighteenth and early nineteenth centuries Was Europe unified by shared religious heritage Where were the edges of Europe Was Europe primarily a commercial network or were there common political practices too Was Britain itself a European country While intellectual history is concerned predominantly with prominent thinkers Paul Stock traces the history of ideas in non elite contexts offering a detailed analysis of nearly 350 geographical reference works textbooks dictionaries and encyclopaedias which were widely read by literate Britons of all classes and can reveal the formative ideas about Europe circulating in Britain ideas about religion the natural environment race and other theories of human difference the state borders the identification of the centre and edges of Europe commerce and empire and ideas about the past progress and historical change By showing how these and other questions were discussed in eighteenth and nineteenth century British culture Europe and the British Geographical Imagination 1760 1830 provides a thorough and much needed historical analysis of Britain's enduringly complex intellectual relationship with Europe

The Patchwork of World History in Texas High Schools Stephen Jackson, 2022-11-30 This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas a populous and nationally influential state over the last hundred years Arguing that the course is a result of a patchwork of competing groups and ideas that have intersected over the past century with each new framework patched over but never completely erased or replaced the author crucially examines themes of imperialism Eurocentrism and nationalism in both textbooks and the curriculum more broadly The first part of the book presents an overview of the World History course supported by numerical analysis of textbook content and public documents while the second focuses on the depiction of non

Western peoples and persistent narratives of Eurocentrism and nationalism It ultimately offers that a more global accurate and balanced curriculum is possible despite the tension between the ideas of professional world historians who often de center the nation state in their quest for a truly global approach to the subject and the historical core rationale of state sponsored education in the United States to produce loyal citizens Offering a new conceptual understanding of how colonial themes in World History curriculum have been dealt with in the past and are now engaged with in contemporary times it provides essential context for scholars and educators with interests in the history of education curriculum studies and the teaching of World History in the United States

The Silk Road in World History Xinru Liu, 2010-07-09 The Silk Road was the contemporary name for a complex of ancient trade routes linking East Asia with Central Asia South Asia and the Mediterranean world This network of exchange emerged along the borders between agricultural China and the steppe nomads during the Han Dynasty 206BCE 220CE in consequence of the inter dependence and the conflicts of these two distinctive societies In their quest for horses fragrances spices gems glassware and other exotics from the lands to their west the Han Empire extended its dominion over the oases around the Takla Makan Desert and sent silk all the way to the Mediterranean either through the land routes leading to the caravan city of Palmyra in Syria desert or by way of northwest India the Arabian Sea and the Red Sea landing at Alexandria The Silk Road survived the turmoil of the demise of the Han and Roman Empires reached its golden age during the early middle age when the Byzantine Empire and the Tang Empire became centers of silk culture and established the models for high culture of the Eurasian world The coming of Islam extended silk culture to an even larger area and paved the way for an expanded market for textiles and other commodities By the 11th century however the Silk Road was in decline because of intense competition from the sea routes of the Indian Ocean Using supply and demand as the framework for analyzing the formation and development of the Silk Road the book examines the dynamics of the interactions of the nomadic pastoralists with sedentary agriculturalists and the spread of new ideas religions and values into the world of commerce thus illustrating the cultural forces underlying material transactions This effort at tracing the interconnections of the diverse participants in the transcontinental Silk Road exchange will demonstrate that the world had been linked through economic and ideological forces long before the modern era
