

World History

Module Notes

New Ecosystems

The paleolithic hunter gatherers would keep moving to new places where there were more food sources available. The neolithic introduced agriculture, which changed this.

When the ice age ended 12,000 years ago, many animals that humans hunted went extinct.

Cultivation and Domestication

Climate change caused Neo societies to adjust their practices. And if populations kept increasing, they would be pressured to use agricultural practices.

Agriculture caused the plant species used to evolve according to what the Neos wanted.

Variants

In the fertile crescent, crops like lentils, figs, and peas were grown, and pigs and cattle were domesticated.

Ancient China entered the Neo age 8,500 years ago. They domesticated chicken, pigs, and water buffalo as well as rice, millet, and soy.

In North America, the Neo age began 9,000 years ago, when they domesticated squash, beans, and turkeys. And in South America, quinoa and potatoes were grown, and guinea pigs and alpacas were domesticated.
