S. Navy and Marine Corps, Part 2* Bert Kinzey, 2025-01-04 Jet Fighters of the U S Navy and Marine Corps is a two book series that describes the entire history of American Naval jet fighters from the very beginning when many thought that the onset of military jets would mean the end of naval carrier based aviation to today when the fifth generation stealth jet F 35B C Lightning II has begun its service with both the Navy and Marine Corps Both volumes cover every jet fighter that has ever been produced for the Navy and the Marine Corps and not only those that were used operationally but even the aircraft that only made it to the flying prototype stage are included Also covered by the books is the history of how American aircraft carriers evolved from the ESSEX class ships that won World War II with propeller driven aircraft to the mighty supercarriers of today In the first book Jet Fighters of the U S Navy and Marine Corps Part 1 The First Ten Years author Bert Kinzey described the first and second generation jet fighters that came on the scene at the end of or shortly after World War II These jet fighters made their first flights between 1945 and 1954 and the book covers fifteen aircraft arranged according to the chronological order of the date of their first flight This concluding volume Jet Fighters of the U S Navy and Marine Corps Part 2 Mach 1 and Beyond resumes where Part 1 left off and continues to the present day The evolution of the United States Navy s aircraft carriers is again picked up and covers continued modifications to the ESSEX and MIDWAY class carriers and to the initial super carriers of the FORRESTAL CLASS The follow on super carriers of the KITTY HAWK NIMITZ and FORD classes are discussed to highlight the continued evolution required to handle the ever increasingly sophisticated jet aircraft that have achieved operational status The thirteen aircraft covered in Part 2 begin with the Chance Vought F 8 Crusader the first Navy and Marine jet fighter able to routinely exceed supersonic speeds and which brought U S Navy jet fighters on par in performance to their land based counterparts As with Part 1 the scope of this publication includes all Navy jet fighter designs that reached at least the flying prototype stage so the F11F 1F Super Tiger F5D Skylancer and XF8U 3 Crusader III each of which was developed from an existing aircraft design are all covered Also included is the F 111B Secretary of Defense Robert McNamara s vision of a be all do all aircraft for both the Navy and the Air Force It was a concept which at that time was simply not possible to achieve Of all the Navy and Marine jet fighters that became operational during the first ten years only three the F9F Panther F2H Banshee and F3D Skyknight ever engaged in combat But the world was changing and all of the fighters covered here in Part 2 that became operational with fleet squadrons saw and continue to see plenty of combat around the world The Navy and Marines have also operated three different types of jet fighters as well as other types

Burr, 2023-10-16 Are the criteria of authenticity of Jesus research idiosyncratic to New Testament studies vehicles of subjectivity and fundamentally flawed vestiges of form criticism as some claim today If so why do opponents of the criteria approach still use them Or are the criteria the tools of general historiography as others assert If true none have adequately demonstrated where and how principles such as multiple attestation general and historical coherence dissimilarity and embarrassment feature in general historiographic method until now This study analyzes the methods of general historians and Jesus researchers who favor or oppose the criteria and demonstrates that regardless of sub discipline authenticating criteria are inherent to the practice of

historiography **Organizations at War in Afghanistan and Beyond** Abdulkader H. Sinno, 2008 While popular accounts of warfare particularly of nontraditional conflicts such as guerrilla wars and insurgencies favor the roles of leaders or ideology social scientific analyses of these wars focus on aggregate categories such as ethnic groups religious affiliations socioeconomic classes or civilizations Challenging these constructions Abdulkader H Sinno closely examines the fortunes of the various factions in Afghanistan including the mujahideen and the Taliban that have been fighting each other and foreign armies since the 1979 Soviet invasion Focusing on the organization of the combatants Sinno offers a new understanding of the course and outcome of such conflicts Employing a wide range of sources including his own fieldwork in Afghanistan and statistical data on conflicts across the region Sinno contends that in Afghanistan the groups that have outperformed and outlasted their opponents have done so because of their successful organization Each organization s ability to mobilize effectively execute strategy coordinate efforts manage disunity and process information depends on how well its structure matches its ability to keep its rivals at bay Centralized organizations Sinno finds are generally more effective than noncentralized ones but noncentralized ones are more resilient absent a safe haven Sinno s organizational theory explains otherwise puzzling behavior found in group conflicts the longevity of unpopular regimes the demise of popular movements and efforts of those who share a common cause to undermine their ideological or ethnic kin The author argues that the organizational theory applies not only to Afghanistan where he doubts the effectiveness of American state building efforts but also to other ethnic revolutionary independence and secessionist conflicts in North Africa the Middle East and beyond
