Teaching Climate Change for Grades 6-12 Kelley T. Lê,2021-06-20 Looking to tackle climate change and climate science in your classroom This timely and insightful book supports and enables secondary science teachers to develop effective curricula ready to meet the Next Generation Science Standards NGSS by grounding their instruction on the climate crisis Nearly one third of the secondary science standards relate to climate science but teachers need design and implementation support to create empowering learning experiences centered around the climate

crisis Experienced science educator instructional coach and educational leader Dr Kelley T Le offers this support providing an overview of the teaching shifts needed for NGSS and to support climate literacy for students via urgent topics in climate science and environmental justice from the COVID 19 pandemic to global warming rising sea temperatures deforestation and mass extinction You ll also learn how to engage the complexity of climate change by exploring social racial and environmental injustices stemming from the climate crisis that directly impact students By anchoring instruction around the climate crisis Dr Le offers guidance on how to empower students to be the agents of change needed in their own communities A range of additional teacher resources are also available at www.empoweredscienceteachers.com

Educational Recommender Systems and Technologies: Practices and Challenges Santos, Olga C.,2011-12-31

Recommender systems have shown to be successful in many domains where information overload exists This success has motivated research on how to deploy recommender systems in educational scenarios to facilitate access to a wide spectrum of information Tackling open issues in their deployment is gaining importance as lifelong learning becomes a necessity of the current knowledge based society Although Educational Recommender Systems ERS share the same key objectives as recommenders for e commerce applications there are some particularities that should be considered before directly applying existing solutions from those applications Educational Recommender Systems and Technologies Practices and Challenges aims to provide a comprehensive review of state of the art practices for ERS as well as the challenges to achieve their actual deployment Discussing such topics as the state of the art of ERS methodologies to develop ERS and architectures to support the recommendation process this book covers researchers interested in recommendation strategies for educational scenarios and in evaluating the impact of recommendations in learning as well as academics and practitioners in the area of technology enhanced learning
