

QUESTIONS FOR DISCUSSION CONTINUED

- How does Marcus feel about “heartbeat” corporations? Are all heartbeat corporations bad? What are some of the recognizable technology companies Marcus mentions in the novel and what are his opinions of them?
- How does Marcus use the New (Internet) and the Old (to undermine government surveillance)? How does he use the Internet to organize his work partners? Is he surprised by the results of his actions? What are the most surprising similarities/differences between an FBI crowd and a crowd in a real public space?
- What is Bayesian probability and how does it relate to Marcus and Jack’s strategies for safely encrypting their communications? How does Piggman fit into the plan? Why does this company appeal to Marcus?
- What historical events inspire Marcus to form a protest community? Is protest the only way to determine the acceptable level of sacrificed personal freedom for the good of the network? Cite the novel or real, historical examples in your answer.
- Describe Marcus’s key system for creating an ever-changing circle of trusted community members. Is this a good system? What are its flaws or risks?
- Why do Kim and Jack break away from Marcus? If you had been part of Marcus’s group, would you have stuck with him? Why or why not?
- Does the media overemphasize identity theft and internet predators while underplaying the danger of being “watched” by legal government and corporate agencies through credit history, transportation monitoring, etc.? How has this imbalance occurred and it surveillance the greater danger?
- “Don’t Trust Anyone Over 25” becomes an Internet motto and then a mathematical slogan. How does today’s internet require public adoption of new ideas? Is this a good thing, a dangerous thing, or both?
- How does Marcus’s physical relationship with Jack affect his actions and attitudes? Is the absence of physical contact an important consideration when studying the Internet? Do people trust others the same way in internet conversations as they do face-to-face? If not, what are the differences?
- Who ultimately betrays Marcus, and how and why? Whom does Marcus ultimately trust to save himself and his friends? Is this a surprising reveal? What actions do Marcus and his confidantes take to help him regain a certain type of freedom? How does Marcus feel about going down the path?
- Is widely disseminated information always less lethal than a carefully kept secret (e.g., a how-to on weapons building or an encryption method)? Is this a great paradox of the information age?
- Marcus and his friends all seem to be quite intelligent and share a passion for figuring out how things work. Do these qualities make them safer than other characters in the world of *Little Brother* to create safer in-group?
- Are government attempts to “protect” citizens through surveillance identical to anyone with an understanding of security technology? Should America be safer if all of its citizens learned more about the computers upon which they rely? How else could that safety be made safer? By whom? From where?
- What is Marcus’s job at the end of the novel? What do you think are the advantages and disadvantages, satisfactions and frustrations of this job? Is it important to have people like Marcus on the Internet? Why or why not?
- How do the afterwords affect your reading of *Little Brother*? How do the experiences of reading this book change your understanding of—or your standards for—security, privacy, and freedom? If so, how?

LITTLE BROTHER

CORY DOCTOROW

ABOUT LITTLE BROTHER

Sometime in the near future, tech-savvy teenager Marcus follows his friend Jack in the wrong place at the wrong time and becomes a terrorism suspect. Suddenly his casual algorithm to being monitored—works, internet use, the school-employment gap system, and public transit fare passes—becomes a critical, life-altering process. But, how do you thwart the efforts of omniscient watchers without becoming as guilty of the invasion of others' privacy as your enemy? Where is the line between public safety and personal freedom? One intelligent romp through the worlds of surveillance, code-writing, and covert communication also offers a compelling exploration of the question: What will be the legacy of the young people who grow up in an age of high-tech "and-then-what?"

Students for all of your research needs *Little Brother & Homeland* Cory Doctorow, 2020-07-07 Cory Doctorow's two New York Times bestselling novels of youthful rebellion against the torture and surveillance state now available in a softcover omnibus. A wonderful important book I'd recommend Little Brother over pretty much any book I've read this year. Neil Gaiman. Little Brother. Marcus Yallow is seventeen years old when he skips school and finds himself caught in the aftermath of a terrorist attack on San Francisco. In the wrong place at the wrong time, Marcus and his friends are apprehended by the Department of Homeland Security and whisked away to a secret prison where they are brutally interrogated for days. When the DHS finally releases them, Marcus discovers that his city has become a police state. He knows that no one will believe him, which leaves him one option: to take down the DHS himself. Can one brilliant teenage hacker actually fight back? Maybe, but only if he's very careful, and if he chooses his friends well. *Homeland*. A few years after the events of Little Brother, California's economy collapses, and Marcus finds himself employed by a crusading politician who promises reform. Then his former nemesis, Masha, emerges with a thumbdrive containing WikiLeaks-style evidence of government wrongdoing. When Marcus witnesses Masha's kidnapping by the same agents who detained and tortured him earlier, he has to decide whether to save her or leak the archive that will cost his employer the election and put thousands at risk. Surrounded by friends who consider him a hacker hero stalked by people who look like they're used to inflicting pain, Marcus has to act, and act fast. As dead serious as *Nineteen Eighty-Four*, as potentially important a novel of ideas with a much more engaging central character and an apparently inexhaustible supply of information on everything from brewing coffee to sneaky surveillance and how to defeat it. *The Wall Street Journal* on *Homeland*: At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied. **Promoting Great Reads to Improve Teen Reading** Lucy Schall, 2015-02-12
