Fluorescent Energy Transfer Nucleic Acid Probes Vladimir V. Didenko,2008-02-04 Fluorescent nucleic acid probes which use energy transfer include such constructs as molecular beacons molecular break lights Scorpion primers TaqMan probes and others These probes signal detection of their targets by changing either the intensity or the color of their fluorescence Not surpr ingly these luminous multicolored probes carry more flashy names than their counterparts in the other fields of molecular biology In recent years fluor cent probes and assays which make use of energy transfer have multiplied at a high rate and have found numerous applications However in spite of this explosive growth in the field there are no manuals summarizing different p tocols and fluorescent probe designs In view of this the main objective of Fluorescent Energy Transfer Nucleic Acid Probes Designs and Protocols is to provide such a collection Oligonucleotides with one or several chromophore tags can form fluor cent probes capable of energy transfer Energy transport within the probe can occur via the resonance energy transfer mechanism also called F rster tra fer or by non F rster transfer mechanisms Although the probes using F rster transfer were developed and used first the later non F rster based probes such as molecular beacons now represent an attractive and widely used option The term fluorescent energy transfer probes in the title of this book covers both F rster based fluorescence resonance energy transfer FRET probes and probes using non FRET mechanisms Energy transfer probes serve as molecule size sensors changing their fluorescence upon detection of various DNA reactions

Carbon Allotropes: Metal-Complex Chemistry, Properties and Applications Boris Ildusovich Kharisov,Oxana Vasilievna Kharissova,2019-01-02 This book provides a detailed description of metal complex functionalized carbon allotrope forms including classic such as graphite rare such as M or T carbon and nanoforms such as carbon nanotubes nanodiamonds etc Filling a void in the nanotechnology literature the book presents chapters generalizing the synthesis structure properties and applications of all known carbon allotropes Metal complex composites of carbons are described along with several examples of their preparation and characterization soluble metal complex carbon composites cost benefit data metal complexes as precursors of carbon allotropes and applications A lab manual on the synthesis and characterization of carbon allotropes and their metal complex composites is included Provides a complete description of all carbon allotropes both classic and rare as well as carbon nanostructures and their metal complex composites Contains a laboratory manual of experiments on the synthesis and characterization of metal complex carbon composites Discusses applications in diverse fields such as catalysis on supporting materials water treatment sensors drug delivery and devices
