the kick is moving so that you don't take the brunt of the force For the roundhouse move out to the side the kick is moving and reach over and around the kick like a wrestler's overhook For the teep you want to move back very slightly and grab the heel with one hand and the top of the ankle or instep with the other Catching roundhouse kicks to the head is also easy if not somewhat more risky You are still going to step out to the side but you are going to block with your close arm With the far side arm you are going to reach under and over to grab the kick kind of like a wrestler's underhook You can catch kicks to the legs in Muay Thai but this isn't recommended This is because in Muay Thai catching a low kick is a high risk low reward technique Trying to grab a low kick leaves your head exposed which a high level kicker will take advantage of Also with how much better checking low kicks usually is catching a low kick just isn't worth it Ready to learn more Get a Copy of This Book Now
