The Arms Dynamic In World Politics

Ian R. Kenyon, John Simpson

The Arms Dynamic In World Politics:

The Arms Dynamic in World Politics Barry Buzan, Eric Herring, 1998 Presented as a successor to the Cold War era book *An Introduction to Strategic Studies* this volume explores issues of military security through a framework that links the issues of technology and world politics Arguing that the technological aspect of the global strategic environment is partway through a centuries long process of transformation sped up by the advent of the information age the authors examine such issues as different levels of industrial development on security what they argue is the relative infrequency of the use of force between states the use of military threats such as mass destruction concepts that military means create problems in themselves such as fear of war and insecurity and finally ways in which regulatory schemes such as disarmament can be put to use to solve some of those problems Paper edition unseen 22 50 Annotation copyrighted by Book News Inc Portland OR

Arms Races in International Politics Thomas G. Mahnken, Joseph Maiolo, David Stevenson, 2016 This volume provides the first comprehensive history of the arms racing phenomenon in modern international politics drawing both on theoretical approaches and on the latest historical research Written by an international team of specialists it is divided into four sections before 1914 the inter war years the Cold War and extra European and post Cold War arms races Twelve case studies examine land and naval armaments before the First World War air land and naval competition during the 1920s and 1930s and nuclear as well as conventional weapons since 1945 Armaments policies are placed within the context of technological development international politics and diplomacy and social politics and economics An extended general introduction and conclusion and introductions to each section provide coherence between the specialized chapters and draw out wider implications for policymakers and for political scientists **Arms Races in International Politics** addresses two key questions what causes arms races and what is the connection between arms races and the outbreak of wars **The Globalization of**

World Politics John Baylis, Steve Smith, Patricia Owens, 2011 Now in its fifth edition this title has been fully revised and updated in the light of recent developments in world politics with new chapters on the changing nature of war human security and international ethics **Strategy And Defense Policy For Small States: Problems And Prospects** Bernard F W Loo, 2021-11-08 For students of Strategic Studies in small countries with limited financial human and military resources the available literature on Strategic Studies in particular texts that seek to explain the key concepts and components of Strategic Studies can be very alien in its focus to the strategic conditions and issues that these countries face This book contains a collection of essays that seeks to discuss key concepts in Strategic Studies as well as contemporary challenges in strategy and defence policy from the perspective of small states It is based on the idea derived from the German philosopher of war Carl von Clausewitz that there is a distinction between logic and grammar while the field of Strategic Studies contains a number of key concepts such as geopolitics and geostrategy strategic culture arms dynamics and the phenomenon of military modernization that are universal in logic the grammar that is the specific manifestations of these concepts in the

contexts of small states is necessarily different from larger more materially endowed states [Related Link s](#)

Strategy and Defence Planning Colin S. Gray, 2014-06-26 *Strategy and Defence Planning Meeting the Challenge of Uncertainty* explores and examines why and how security communities prepare purposefully for their future defence The author explains that defence planning is the product of interplay among political process historical experience and the logic of strategy The theory of strategy best reveals both the nature and the working of defence planning Political ends strategic ways and military means all fed by reigning if not always recognized assumptions organize the subject well with a template that can serve any time place and circumstance The book is designed to help understanding of what can appear to be a forbiddingly complex as well as technical subject A good part of the problem for officials charged with defence planning duties is expressed in the second part of the book s title The real difficulty which rarely is admitted by those tasked with defence planning duty is that defence planning can only be guesswork But because defence preparation is always expensive not untypically is politically unpopular yet obviously can be supremely important claims to knowledge about the truly unknowable persist In truth we cannot do defence planning competently because our ignorance of the future precludes understanding of what our society will be shown by future events to need The challenge faced by the author was to identify ways in which our problems with the inability to know the future in any detail in advance the laws of nature in other words may best be met and mitigated Professor Gray argues that our understanding of human nature of politics and of strategic history does allow us to make prudent choices in defence planning that hopefully will prove good enough

Technology and Security Brian Rappert, 2007-10-11 This book takes forward the existing state of academic understanding where security and technology intersect It assesses the challenges posed by emerging scientific and technological developments for security while understanding how perceptions of security threats are themselves formed in relation to conceptions of science and technology

Contemporary Security Studies Alan Collins, 2022 With unrivalled coverage of a wide range of issues from terrorism nuclear deterrence and the weapons trade to environmental security transnational crime and cyber security *Contemporary Security Studies* is the definitive cutting edge introduction to security studies Bringing together contributions from leading scholars it provides a student friendly guide to traditional and critical theoretical approaches as well as the most important contemporary issues that dominate the modern security field Whether you are exploring how politicians portrayed the Covid19 pandemic as a security issue or the role that popular culture plays in promoting peace a broad variety of real world case studies and examples throughout the text encourage you to question your preconceptions of security studies and to critically evaluate key approaches and ideas in the subject New to this Edition A new Chapter 13 on popular culture introduces you to this innovative approach to security studies exploring the role that it plays in shaping and understanding security related processes A revised Chapter 12 on securitization theory traces its emergence and evolution as a framework for analysis covering everything you need to know about its main concepts and criticisms Chapter 27 on

transnational crime now includes coverage of the crime terror nexus the relationship between organized crime and the state and a case study focusing on Mexico Every chapter has been thoroughly updated to reflect current political issues and developments in world affairs such as the initial impact of the Covid 19 pandemic climate change and forced migration Book jacket

Artificial intelligence and the future of warfare James Johnson, 2021-09-14 This volume offers an innovative and counter intuitive study of how and why artificial intelligence infused weapon systems will affect the strategic stability between nuclear armed states Johnson demystifies the hype surrounding artificial intelligence AI in the context of nuclear weapons and more broadly future warfare The book highlights the potential multifaceted intersections of this and other disruptive technology robotics and autonomy cyber drone swarming big data analytics and quantum communications with nuclear stability Anticipating and preparing for the consequences of the AI empowered weapon systems are fast becoming a critical task for national security and statecraft Johnson considers the impact of these trends on deterrence military escalation and strategic stability between nuclear armed states especially China and the United States The book draws on a wealth of political and cognitive science strategic studies and technical analysis to shed light on the coalescence of developments in AI and other disruptive emerging technologies Artificial intelligence and the future of warfare sketches a clear picture of the potential impact of AI on the digitized battlefield and broadens our understanding of critical questions for international affairs AI will profoundly change how wars are fought and how decision makers think about nuclear deterrence escalation management and strategic stability but not for the reasons you might think

Ethnic Violence and the Societal Security Dilemma Paul Roe, 2004-08-02 Ethnic Violence and the Societal Security Dilemma explores how the phenomenon of ethnic violence can be understood as a form of security dilemma by shifting the focus of the concept away from its traditional concern with state sovereignty to that of identity instead The book includes case studies on ethnic violence between Serbs and Croats in the Krajina region of Croatia August 1990 ethnic violence between Hungarian and Romanians in the Transylvania region of Romania March 1990

The Realism Reader Colin Elman, Michael Jensen, 2014-08-12 The Realism Reader provides broad coverage of a centrally important tradition in the study of foreign policy and international politics After some years in the doldrums political realism is again in contention as a leading tradition in the international relations sub field Divided into three main sections the book covers seven different and distinctive approaches within the realist tradition classical realism balance of power theory neorealism defensive structural realism offensive structural realism rise and fall realism and neoclassical realism The middle section of the volume covers realism s engagement with critiques levelled by liberalism institutionalism and constructivism and the English School The final section of the book provides materials on realism s engagement with some contemporary issues in international politics with collections on United States U S hegemony European cooperation and whether future threats will arise from non state actors or the rise of competing great powers The book offers a logically coherent and manageable framework for organizing the realist canon and provides

exemplary literature in each of the traditions and dialogues which are included in the volume Offering substantial commentary and analysis and including enhanced pedagogy to facilitate student learning The Realism Reader will provide a one stop shop for undergraduates and masters students taking a course in contemporary international relations theory with a particular focus on realism

The Second Nuclear Age Colin S. Gray, 1999 The author takes issue with the complacent belief that a happy mixture of deterrence arms control and luck will enable humanity to cope adequately with weapons of mass destruction arguing that the risks are ever more serious

The Origins of World War Two Robert Boyce, Joseph A. Maiolo, 2017-03-14 No issue in modern history has been more intensively studied or subject to wider interpretation than the origins of the Second World War A conflict involving three arguably four major aggressor Powers operating simultaneously but largely separately on two continents inevitably raises complex theories and debates Each participating power has its own history and each one must take account of various influences upon the behaviour of its soldiers and statesmen His wide ranging collection of original essays each by an international expert in their field covers all aspects of the subject and highlights the controversy that continues to characterise current thinking on the origins of the war Going beyond the usual Eurocentric approach Part I examines the roles of all seven of the Great Powers including Japan and the USA as well as the parts played by several of the lesser Powers such as Czechoslovakia Poland and China Part II contains chapters which explore key themes that cannot be fully understood within the context of any single country These themes include the role of ideology propaganda intelligence armaments economics diplomacy the neutral states peace movements and the social science approach to war Written in clear jargon free prose together these essays provide a comprehensive single volume text for students and teachers and are essential reading for all with an interest in the debates surrounding the causes of World War Two

The Modern Defense Industry Richard A. Bitzinger, 2009-10-15 Whether it s guns and ammunition or multidimensional anti terrorism systems the defense industry is dynamic complex and ubiquitous It is also mysterious powerful and controversial involving thousands of players worldwide from suppliers and producers to government and military procurers to shadowy figures that trade in the black market This comprehensive two volume reference will explore on a global scale the various issues concepts problems and controversies surrounding the rise of the modern defense industry Unparalleled in its scope and insight The Modern Defense Industry will prove invaluable to the industry s critics and champions alike The phenomenon of a more or less permanent defense industry especially one so wide in scale breadth air sea land and space technology and geography is still relatively new Until now its implications for politics economics and technology have not been adequately discussed in an authoritative accessible format for scholars and researchers business people journalists policymakers and interested laymen The Modern Defense Industry addresses the period from 1945 to the present covering the United States Europe Russia China Israel and other important arms producing and arms procuring countries Including essays by experts from around the world a glossary data on firms and governments laws and policies

primary documents case studies and a host of other elements this set will be a unique resource for anyone interested in the arms industry It will also offer penetrating insights into topics like international relations and diplomacy arms proliferation and contemporary politics Volume I comprises chapters by experts in the field on topics like the relationship between the industry military and government how new modes of warfare are changing the industry the implications of globalization on the industry the black and gray areas of the arms trade and much more Volume II features an extensive A Z glossary of terms lists of defense firms and government agencies annotated primary documents lists of leading defense contractors and key weapons systems an analysis of key legislation and professional organizations The Modern Defense Industry sets the standard for state of the art overviews of an industry that has for better or worse come to infuse nearly every aspect of world affairs in the early twenty first century

The Logic of American Nuclear Strategy Matthew Kroenig, 2018 For decades the reigning scholarly wisdom about nuclear weapons policy has been that the United States only needs the ability to absorb an enemy nuclear attack and still be able to respond with a devastating counterattack So long as the US or any other nation retains such an assured retaliation capability no sane leader would intentionally launch a nuclear attack against it and nuclear deterrence will hold According to this theory possessing more weapons than necessary for a second strike capability is illogical This argument is reasonable but when compared to the empirical record it raises an important puzzle Empirically we see that the United States has always maintained a nuclear posture that is much more robust than a mere second strike capability In *The Logic of American Nuclear Strategy* Matthew Kroenig challenges the conventional wisdom and explains why a robust nuclear posture above and beyond a mere second strike capability contributes to a state's national security goals In fact when a state has a robust nuclear weapons force such a capability reduces its expected costs in a war provides it with bargaining leverage and ultimately enhances nuclear deterrence This book provides a novel theoretical explanation for why military nuclear advantages translate into geopolitical advantages In so doing it helps resolve one of the most intractable puzzles in international security studies Buoyed by an innovative thesis and a vast array of historical and quantitative evidence *The Logic of American Nuclear Strategy* will force scholars to reconsider their basic assumptions about the logic of nuclear deterrence

AI and the Bomb James Johnson, 2023 This book provides a coherent innovative and multidisciplinary examination of the potential effects of AI technology on nuclear strategy and escalation risk Its findings have significant theoretical and policy ramifications as well as contributing to the literature on the impact of military force and technological change

The Evolution of International Security Studies Barry Buzan, Lene Hansen, 2009-08-27 The first intellectual history of International Security Studies since 1945 providing an unparalleled survey for students and scholars

Theory of Strategy Colin S. Gray, 2018 This book provides a short and accessible introduction to the theory of strategy examines the general theory of strategy in accordance with 23 key Principles and explains its nature functions and intended consequences Theory of Strategy makes the radical argument that the familiar structure of strategy's general theory political ends strategic

ways military means and assumptions holds as sound for security at all times and in all places of human necessity Strategy is ever varying in its character but not in its nature which is unchanging Handbook of Defense Economics Todd Sandler, Keith Hartley, 2007-04-12 The second volume of the Handbook of Defense Economics addresses defense needs practices threats and policies in the modern era of globalization This new era concerns the enhanced cross border flows of all kinds e g capital and labor flows revolutionary rhetoric guerrillas and terrorists including the spillovers of benefits and costs associated with public goods and transnational externalities i e uncompensated interdependencies affecting two or more nations These ever increasing flows mean that military armaments and armies are less able to keep out security threats Thus novel defense and security barriers are needed to protect borders that are porous to terrorists pollutants political upheavals and conflicts Even increased trade and financial flows imply novel security challenges and defenses Globalization also underscores the importance of a new set of institutions e g the European Union and global governance networks and agents e g nongovernmental organizations and partnerships This volume addresses the security challenges in this age of globalization where conflicts involve novel tactics new technologies asymmetric warfare different venues and frightening weapons Volume 2 contains topics not covered in volume 1 i e civil wars peacekeeping economic sanctions the econometrics of arms races conversion peace economics and the interface of trade peace and democracy Volume 2 also revisits topics from volume 1 where there has been a significant advancement of knowledge i e conflict analysis terrorism arms races arms trade military manpower and arms industries All of the main securities concerns of today are analyzed Chapters are written by the leading contributors in the topic areas Up to date surveys on the pressing defense issues theoretical empirical and policy issues Coverage of theoretical and empirical studies of terrorism Contributions by the leading researchers in the field of defense economics **People, States & Fear** Barry Buzan, 2008-03-01 This widely acclaimed book examines how states and societies pursue freedom from threat in an environment in which competitive relations are inescapable across the political economic military societal and environmental landscapes Throughout attention is placed on the interplay of threats and vulnerabilities the policy consequences of overemphasising one or the other and the existence of contradictions within and between ideas about security Barry Buzan argues that the concept of security is a versatile penetrating and useful way to approach the study of international relations Security provides an analytical framework between the extremes of power and peace incorporates most of their insights and adds more of its own People States Fear is essential reading for all students and researchers of international politics and security studies A new introduction placing this classic text in a current context was added to this book by the author in 2007 Deterrence and the New Global Security Environment Ian R. Kenyon, John Simpson, 2013-10-18 This collection of papers rigorously examines the current place of deterrence in international security relations delivering the best of contemporary thinking This is a special issue of the leading journal Contemporary Security Policy It shows how and why nuclear deterrence was the central organizing mechanism for international security relations in

the second half of the twentieth century It has been replaced by a new global security environment in which the central role of deterrence both nuclear and otherwise appears to have diminished The Cold War has been succeeded by a new state of play This book will be of interest to students of military and naval history and security studies

Reviewing **The Arms Dynamic In World Politics**: Unlocking the Spellbinding Force of Linguistics
