down those who abode inland suffering because they lived a few miles away from the cooling breezes of the North Atlantic There wouldn't be much time for fun this summer Working all day in the hot sun was taking its toll Jethro and Mary Preston and their family of six live on an idyllic farm called Noble Hill A spirited group they move through their lives with selfishly devised methods and total disregard of others Jethro is raising his children to be winners and won't accept anything less but he adapts his plan accordingly because he has a different vision for each of his children His formidable personality pushes his youngest son Charles to fulfill his own dream but the youngest Sadie proves to be a handful even for the awe inspiring Jethro However his choice for the middle child Nathan will put his son into a situation that seems impossible to win and constantly subjects the boy to unfair treatment Nate meets the abuse with unwavering dedication barely flinching when his older siblings John and Camille cruelly taunt and trick him His parents appear to overlook his worth relentlessly testing his determined nature and as Nate's life becomes more difficult he tries to find solace in his relationship with his younger sister Emma who has been selected to accompany her brother in the daily labor on the farm The devoted boy eventually realizes that if he is to survive he must dig into the deep recesses of his soul to find the fortitude to prevail Follow Nathan and his siblings through the trials and tribulations of life on Noble Hill

Social Networking in South-Eastern Europe Maria Baramova, Grigor Boykov, Ivan Parvev, 2021 Social Networking in South Eastern Europe in the 15th 19th centuries exhibits specific characteristics the Ottomans and the Habsburgs for example each have their pattern of building and using social networks with the Third South Eastern Europe i.e. the vassal principalities in the Balkans and the re-created national states staying closer in the Ottoman pattern It seems that the Muslim Oriental social traditions established in the Balkans during Ottoman rule had a clear impact on the building of networks and the exercising of social influence The specific regional practices once established were very hard to overcome or to replace by other patterns of social networking These practices however could easily interact in border areas with one other giving the inhabitants on both sides of the frontier the possibility of living a socially amphibious life at least in terms of Social Networking

Operation Thunderhead Clive Hallam, 2010-12-27 It is the year 2039 and the planet teeters on the brink of environmental disaster Continued over production and pollution has depleted all resources and made it difficult for people to find the staples of life food water even clean air are all becoming increasingly difficult to find Countries stand on the brink of war over resources and the big political powers position themselves to covertly control the aftermath The Cairo Environment Summit in the summer is meant to allow everybody to come to a point

of agreement on what to do but the ageing political powerhouses seem intent only on injuring each other The Old World wants immediately to limit activity to reduce the human impact of over production Their New World antagonists aren't convinced wanting to survey the planet's resources and human activity ostensibly to identify the real causes but really to consolidate their position before cuts happen Whoever gains the upper hand in the war of words stands to win the war However both Presidents vacillate over what to do mindful of the opposing and competing political and environmental agendas that could derail the whole process In Europe there is much talking and procrastinating while in the USA the Vice President begins to position himself to take over from an increasingly unpopular President Ever determined to stay one step ahead of the Old World the US turns to its main technology partner who is the world leader in the embedded chip technology Both powers extol the virtues of this interface which allows the user to access the internet and to maintain contact with family friends and work colleagues by providing a direct connection between the brain and outside communications It revolutionises living in the States Europeans are less embracing going for the more limited Omni chip over the American Zeus chip which provides an always on connection After a powerful demonstration of its capabilities the US Government commits itself to a covert operation over which it finds it has increasingly less control It's own Senate Committee investigations on environmental change challenge the wisdom of the country's stance but the two key witnesses soon realise they are fighting a losing battle with all save perhaps the chairperson When the deaths begin mysterious and without apparent cause detectives in Europe seek to find out who might be behind the apparently unconnected but similar sudden deaths In the US secret services agencies wonder whether they can stay on top of the increasing number of human infiltrations that threaten the very security of the country and the military stability of the world
