Benito,R. Narula,2007-10-26 Multinational enterprises do not regard all locations as being equivalent Smaller economies and less developed countries are not as attractive because of a limited market size or lack of proximity to other locations This book focuses on how multinational activity to and from peripheral economies differs from their activity in core economies **This Week in South Africa** ,1995 *Planning and Transformation* Philip Harrison,Alison Todes,Vanessa Watson,2007-09-12 Planning and Transformation provides a comprehensive view of planning under political transition in South Africa offering an accessible resource for both students and researchers in an international and a local audience In the years after the 1994 transition to democracy in South Africa planners believed they would be able to successfully promote a vision of integrated equitable and sustainable cities and counter the spatial distortions created by apartheid This book covers the experience of the planning community the extent to which their aims were achieved and the hindering factors Although some of the factors affecting planning have been context specific the nature of South Africa s transition and its relationship to global dynamics have meant that many of the issues confronting planners in other parts of the world are echoed here Issues of governance integration market competitiveness sustainability democracy and values are significant and the particular nature of the South African experience lends new insights to thinking on these questions exploring the possibilities of achievement in the planning field The Report: South Africa 2013 Oxford Business Group,2013-09-04 The Rainbow Nation benefits from an internationally competitive private sector which accounts for roughly 70% of GDP and extremely competitive infrastructure its utility sector for example produces just under half of the total power generated on the African continent South Africa represents by far the most developed market in Africa but there are still some structural challenges it is grappling with Government strategies have set a target of increasing labour market participation from 54% in 2010 to 65% by 2030 bringing the number of workers in the formal sector to 25 3m people and lowering unemployment from 25% to 6% While its fiscal space is narrow long term investments in infrastructure education and health are expected to be key to attaining its growth potential Recent years have seen both the public and private sectors look to strengthen regulatory frameworks in mining and industry in some cases like the automotive sector with impressive results The English Academy Review ,2006 South African Journal of Science ,2003 *African Armed Forces Journal* ,2005-02 **Computerworld** ,2005-01-10 For more than 40 years Computerworld

has been the leading source of technology news and information for IT influencers worldwide Computerworld's award winning Web site Computerworld.com twice monthly publication focused conference series and custom research form the hub of the world's largest global IT media network *SAMJ*, 1997 **Bulletin of the World Health Organization** World Health Organization, 2011 **Annual Performance Plan** Gauteng (South Africa).
