Refer to Troubleshooting section,  Failure call After-sales Service

## FIRST TIME USE

When starting the appliance the first time, the control panel will automatically show the set language menu. The **UP** and **DOWN** buttons are used to show the languages available in the machine. Press the  button to confirm. The machine cannot be used without having selected the language. Make sure that the water tank is correctly inserted.

The dryer must be installed in a room with a temperature ranging between 5°C and 35°C to ensure proper operation. Before using the dryer make sure it has been in an upright position for at least 6 hours. Should you wish to change the opening side of the door, please contact our After-sales Service. (See phone number in the warranty booklet).

## DAILY USE

Doing this will keep your machine working at its BEST:

- remember to empty your water tank after each drying cycle.
- remember to clean your filters after each drying cycle.

Refer to the Care & Maintenance section.

1. Plug the dryer into the power supply socket.
2. Open the door and load garments; always refer to instructions on clothing labels and the max loads indicated in the programme section. Empty pockets. Make sure garments do not get caught between the door and/or the door filter. Do not load items that are dripping wet. Do not tumble dry large, very bulky items. For optimal drying result, garments should be loaded one by one.
3. Close the door.
4. Press the "On/Off" button.
5. Select the most suitable programme for the type of fabric in that load.
6. Select the options, if necessary.
7. Press the "Start/Pause" button to begin drying.
8. At the end of the drying cycle, a buzzer will beep. An indicator on the control panel signals the end of the cycle. Turn the machine off by pressing the "On/Off" button, open the door and pull the clothing immediately out to prevent the formation of creases on laundry.

If the machine is not switched off manually, after about a quarter of an hour from the end of the cycle, the appliance turns off automatically to save energy.

Note that some models perform a final cool tumble phase; for this reason the fabrics may not feel hot.

In case of power failure, it is necessary to press the "Start/Pause" button to restart the cycle.

### Eco Monitor

This indicator shows the energy consumption level according to the programme and the options set. The consumption is proportional to the lines on the display, by the econmonitor icon.

### Opening the door during the cycle

The tumble dryer door can be opened at any time during the cycle to check progress and remove any garments already dry.

However, since opening the door can extend the drying time, the recommendation is to keep the door closed throughout the cycle process to save time and energy.

After closing the door, press the "Start/Pause" button within 15 minutes to resume the machine operation.

NOTE: in any case, the drying cycle must be completed to ensure the condenser auto-cleaning phase is finalized.

## NAVIGATION

The "UP" and "DOWN" buttons are used to navigate the available menus.

- Press the  button to confirm the selection.
- Press the option button at the  symbol, where present on the display, to return to the previous screen.

If no selection is confirmed, after about 10 seconds, the display return to the main screen.

## SETTINGS

To access the Settings menu, press and hold the relevant button for a few seconds.

- **Set language** shows the available languages on the display.
- **Sounds** allows to enable or disable the sounds (some sounds, as warnings, will remain active anyway).
- **Brightness** allows to modify the display brightness.
- **Factory Default** allows to reset the default settings. After having selected the setting, press and hold the  button for a few seconds.

## CARE LABEL

Always check the care labels, especially when placing garments in the tumble dryer for the first time. Below are the most commonly used symbols:

-  May be tumble dried.
-  Do not tumble dry.
-  Tumble dry – high heat.
-  Tumble dry – low heat.
