

Chapter 11 & 12 Study Guide: Motion & Forces

Chapter 11: Motion

1. Define (include the formula and circle diagram for calculating speed, velocity, and acceleration):
 - a. Distance: The length between two objects or the length of the path traveled.
 - b. Speed: distance traveled by the time it took to travel. $\text{Speed} = \text{distance} / \text{time}$
 - c. Velocity: distance traveled by the time it took to travel and the direction that you travelled in. $\text{velocity} = \text{distance} / \text{time}$
 - d. Acceleration: change in velocity or velocity over time.
2. What is the speed of an object at rest? Zero m/s
3. The difference between speed and velocity is that velocity includes direction.
4. The SI unit for distance is meter (m)
5. The SI unit for speed or velocity is meter per second (m/s) .
6. The SI unit for acceleration is meter per second squared (m/s^2)
7. On a distance-time graph, what does the slope tell you? Speed or velocity.
8. On a speed-time graph, what does the slope tell you? acceleration

Chapter 12: Forces

9. Describe (what does it say and what is it commonly called)
 - a. Newton's First law of Motion: law of inertia. Object in motion stays in motion or an object at rest stays at rest UNLESS acted on by a FORCE.
 - b. Newton's Second law of Motion: $F = ma$. Force equals the product of an object's mass and acceleration. (or Acceleration is equal to the force and inversely proportional to mass)
 - c. Newton's Third law of Motion: Action/Reaction law. For every action there is an equal and opposite reaction.
10. Give an example for each of Newton's laws
 - a. Newton's First law of Motion: bolder won't move unless something pushes on it, and the moon won't stop rotating unless a force acts on it.
 - b. Newton's Second law of Motion it takes more force to accelerate a school bus than a toy car.
 - c. Newton's Third law of Motion: my foot pushed on the ball (action force), the ball pushes back (reaction force) and fly's forward (resulting net force). OR you sitting in the desk is pushing down on the desk and the desk is pushing up on you but they are balanced so no CHANGE in motion.
11. Define and give an example of each of the following terms.

	Definition	Example
a.	Friction: force that opposes motion	a. Friction: heat when rubbing hands together.
b.	Static Friction: friction that prevents object from moving	b. Static Friction: Pushing against dresser that won't move
c.	Sliding Friction: friction that occurs between objects sliding past each other,	c. Sliding Friction: going down a slide, dresser sliding across the floor.
d.	Rolling Friction: friction that occurs between object rolling against another object.	d. Rolling Friction: roller skates on pavement.
e.	Fluid Friction: friction that occurs in a fluid (Example of Fluid: water, quick sand, air...)	e. Fluid Friction: falling leaves, fish

Principles of Microeconomics John E. Sayre, Morris, Alan J. (Alan James), 2006 The Sayre Morris texts have been written for first year economic principles courses offered in colleges and universities In writing the text the authors have focused on four guiding principles Achieve a well written text the authors have developed a well written text that speaks directly to the student At the same time the text avoids unnecessary jargon abstraction and repetition Focus emphasis on the student students learn economics by doing economics Self test questions are positioned throughout each chapter to check for understanding and the authors have integrated a carefully crafted Study Guide with three levels of problems allowing students to master the basics as well as get reinforcement with the more difficult concepts Avoid an encyclopaedic text each text covers the course in 13 carefully crafted chapters allowing for a few extension topics ensuring that most of the text can be covered in the standard 12 or 13 weeks Provide a coherent package the authors have written the text instructor s manual and integrated Study Guide and have carefully supervised the development of the test bank PowerPoint slides and the Online Learning Centre content ensuring an integrated and comprehensive teaching and learning package

Study Guide Plus Gwendolyn E. Nyden, Henslin, 2001-08 [AID EVAPORATION](#) Dr. Litha Musyimi-Ogana, 2023-06-29 Aid Evaporation is a new notion It is based on an academic study that comprehensively examined how ODA is governed from the source to the destination Key ODA parameters emerged from the existing ODA governance frameworks namely mechanism ideology development approach and processes By unpacking elements contributing to aid ineffectiveness through these parameters exploring the existence of the aid evaporation and examining the key enablers of ODA Evaporation the study discovered supply side factors contributed significantly to Aid ineffectiveness It exposed different AID Evaporation enablers which play different hidden functions such as ODA Door Openers Appetizers Softeners Sponges Convertors Controllers Distorters as well as Carrot and Stick among others Key findings revealed that the prevailing perception that aid ineffectiveness was a demand side problem was only part of the story because supply side challenges were probably more responsible for billions of ODA that could not be accounted for It has recommended the re writing of the narrative that ODA ineffectiveness is predominantly premised on demand side by incorporating supply side factors Findings demonstrated that while there were indeed demand side challenges such as bad governance corruption and lack of strong institutions there were also supply donor side challenges such as over reliance of donor s own inefficient ODA governance frameworks as well as ODA delivery mechanisms the entrenchment of bilateral interest in ODA processes and geo political interests among other factors In this regard the study confirmed that the 62% of the ODA that could not be accounted for according to existing literature was either held up in the pipeline or evaporates mostly from the supply side This finding brought clarity on the weak impact of ODA and corroborated with existing literature on the mystery of unaccounted ODA While the notion of aid evaporation emerged as an attribution and part of a reflection on the problem of

ODA dissipation at the preliminary stage of the literature review it became the central issue of focus throughout the research investigation which involved substantive field work to bring clarity on the problem The study has made theoretical and practical contributions to the existing concepts on ODA governance and proposed a new concept namely the Supply Baggage Concept The new concept should inform the Post Paris era in achieving Aid effectiveness by weding out Evaporation using the Aid Evaporation Detection Framework proposed in this book
