Hands-On Neural Networks with TensorFlow 2.0 Paolo Galeone,2019-09-18 A comprehensive guide to developing neural network based solutions using TensorFlow 2.0 Key Features Understand the basics of machine learning and discover the power of neural networks and deep learning Explore the structure of the TensorFlow framework and understand how to transition to TF 2.0 Solve any deep learning problem by developing neural network based solutions using TF 2.0 Book Description TensorFlow the most popular and widely used machine learning framework has made it possible for almost anyone to develop machine learning solutions with ease With TensorFlow TF 2.0 you'll explore a revamped framework structure offering a wide variety of new features aimed at improving productivity and ease of use for developers This book covers machine learning with a focus on developing neural network based solutions You'll start by getting familiar with the concepts and techniques required to build solutions to deep learning problems As you advance you'll learn how to create classifiers build object detection and semantic segmentation networks train generative models and speed up the development process using TF 2.0 tools such as TensorFlow Datasets and

TensorFlow Hub By the end of this TensorFlow book you ll be ready to solve any machine learning problem by developing solutions using TF 2 0 and putting them into production What you will learn Grasp machine learning and neural network techniques to solve challenging tasks Apply the new features of TF 2 0 to speed up development Use TensorFlow Datasets tfds and the tf data API to build high efficiency data input pipelines Perform transfer learning and fine tuning with TensorFlow Hub Define and train networks to solve object detection and semantic segmentation problems Train Generative Adversarial Networks GANs to generate images and data distributions Use the SavedModel file format to put a model or a generic computational graph into production Who this book is for If you re a developer who wants to get started with machine learning and TensorFlow or a data scientist interested in developing neural network solutions in TF 2 0 this book is for you Experienced machine learning engineers who want to master the new features of the TensorFlow framework will also find this book useful Basic knowledge of calculus and a strong understanding of Python programming will help you grasp the topics covered in this book

Safety and Reliability: Methodology and Applications Tomasz Nowakowski, Marek Młyńczak, Anna Jodejko-Pietruczuk, Sylwia Werbińska-Wojciechowska, 2014-09-18 Within the last fifty years the performance requirements for technical objects and systems were supplemented with customer expectations quality abilities to prevent the loss of the object properties in operation time reliability and maintainability protection against the effects of undesirable events safety and security and the ability to restore performance resilience The need to adapt the operation of complex systems in such an uncertain and volatile environment has caused the necessity to formulate new and well established achievements associated with modeling testing and evaluation of these properties The concept of a complex system applies not only to the technical ones but also the infrastructure of major importance for social life such as transportation and logistics systems buildings power systems water distribution systems or health services Safety and Reliability Methodology and Applications contains the proceedings of the 24th European Safety and Reliability Conference ESREL 2014 Wroclaw Poland 14 18 September 2014 and discusses theories and methods and their applications in the areas of risk safety and reliability The abstracts book 408 pages full paper CD ROM 2496 pages will be of interest to researchers and practitioners academics and engineers working in academic industrial and governmental sectors

Interdisciplinary Research in Technology and Management Satyajit Chakrabarti, Ashiq A. Sakib, Souti Chattopadhyay, Sanghamitra Poddar, Anupam Bhattacharya, Malay Gangopadhyaya, 2024-05-30 IRTM 2023 We live in an inter connected world In the era of Industry 5 0 technology is getting embedded more and more in the way we learn live work and play This progression is accelerating at a pace never seen before Inter disciplinary and collaborative research across disciplines within the Technology domain and Management domain and across the Technology Management interface is opening up exciting new possibilities for solving problems whose solutions are beyond the scope of a single discipline domain or practice and helping to create a brave new world We are living in an incredible time of change Our effort to hold such an interdisciplinary conference in the virtual mode

apparently resonated across the academic community as was evident from the huge response that the first ever conference on Interdisciplinary Research in Technology and Management IRTM held in February 2021 had received from participants across many countries This has encouraged the organizers to hold the next edition of the conference physically in Kolkata on a larger scale in the online mode The pandemic unleashed by Covid 19 in the last two years has shaken the socio economic foundations of countries and societies to a point where the world cannot be the same as before the pandemic It has re focused the world s attention on the priority of healthcare and healthcare infrastructure and its innovative management Inevitably questions have again been raised more vehemently on what kind of a world we want to live in Environmental concerns are being pursued with renewed vigour The urgency of developing new robust infrastructure relevant for the new world is gaining wider consensus By 2030 as reports suggest cyber physical systems internet of things and wearable technology will be everywhere and in everything renewable energy will power the world and digital entertainment will take centre stage among other developments The third edition of the conference on Interdisciplinary Research in Technology and Management attempts to spotlight the above concerns The number of tracks on which papers are invited from scholars researchers consultants and practitioners to share their interdisciplinary research and consultative work has been enlarged As before the papers will be peer reviewed and authors of the selected papers will be invited to present their papers in the IRTM conference The presentation of papers will be interspersed with Keynote Talks by eminent experts on the theme of the conference or individual domains

Functional Thinking for Value Creation Jürgen Hesselbach,Christoph Herrmann,2011-03-18 After the IPS2 conferences in Cranfield and Link ping in 2009 and 2010 the 3rd CIRP International Conference on Industrial Product Service Systems IPS2 2011 takes place in Braunschweig Germany IPS2 itself is defined as an integrated industrial product and service offering that delivers value in use The customers expect comprehensive solutions which are adapted to their individual needs IPS2 offers the possibility to stand out from competition and for long term customer loyalty Particularly in times of economic crisis it becomes apparent which producing companies understand to satisfy the needs and requirements of their customers

Especially in this relatively new domain IPS2 it will be important to keep track of the whole context and to seek cooperation with other research fields and disciplines The 3rd CIRP International Conference on Industrial Product Service Systems IPS2 2011 serves as a platform for such collaborations and the discussion of new scientific ideas
