CASL Reference Manual, 2004 *Recommender Systems Handbook* Francesco Ricci, Lior Rokach, Bracha Shapira, 2015-11-17 This second edition of a well received text with 20 new chapters presents a coherent and unified repository of recommender systems major concepts theories methodologies trends and challenges A variety of real world applications and detailed case studies are included In addition to wholesale revision of the existing chapters this edition includes new topics including decision making and recommender systems reciprocal recommender systems recommender systems in social networks mobile recommender systems explanations for recommender systems music recommender systems cross domain recommendations privacy in recommender systems and semantic based recommender systems This multi disciplinary handbook involves world wide experts from diverse fields such as artificial intelligence human computer interaction information retrieval data mining mathematics statistics adaptive user interfaces decision support systems psychology marketing and consumer behavior Theoreticians and practitioners from these fields will find this reference to be an invaluable source of ideas methods and techniques for developing more efficient cost effective and accurate recommender systems *Information Systems* Marinos Themistocleous, Vincenzo Morabito, 2017-08-14 This book constitutes selected papers from the 14th European Mediterranean and Middle Eastern Conference EMCIS 2017 held in Coimbra Portugal in September 2017 EMCIS is focusing on approaches that facilitate the identification of innovative research of significant relevance to the IS discipline following sound research methodologies that lead to results of measurable impact The 37 full and 16 short papers presented in this volume were carefully reviewed and selected from a total of 106 submissions They are organized in sections on big data and Semantic Web digital services social media and digital collaboration e government healthcare information systems information systems security and information privacy protection IT governance and management and organizational issues in information systems **Context-Aware Collaborative Prediction** Shu Wu, Qiang Liu, Liang Wang, Tieniu Tan, 2018-03-10 This book presents two collaborative prediction approaches based on contextual representation and hierarchical representation and their applications including context aware recommendation latent collaborative retrieval and click through rate prediction The proposed techniques offer significant improvements over current methods the key determinants being the incorporated contextual representation and hierarchical representation To provide a background to the core ideas presented it offers an overview of contextual modeling and the theory of contextual representation and hierarchical representation which are constructed for the joint interaction of entities and contextual information The book offers a rich blend of theory and practice making it a valuable resource for students researchers and practitioners who need to construct systems of information retrieval data mining and recommendation systems with contextual information **Advances in Computing** Andrés Solano, Hugo Ordoñez, 2017-08-14 This book constitutes the refereed proceedings of the 12th Colombian Conference on Computing CCC 2017 held in Cali Colombia in September 2017

The 56 revised full papers presented were carefully reviewed and selected from 186 submissions. The papers are organized in topical sections on information and knowledge management software engineering and IT architectures educational informatics intelligent systems and robotics human computer interaction distributed systems and large scale architectures image processing computer vision and multimedia security of the information formal methods computational logic and theory of computation.

New Trends in Databases and Information Systems Barbara Catania, Tania Cerquitelli, Silvia Chiusano, Giovanna Guerrini, Mirko Kämpf, Alfons Kemper, Boris Novikov, Themis Palpanas, Jaroslav Pokorný, Athena Vakali, 2013-08-17. This book reports on state of art research and applications in the field of databases and information systems. It includes both fourteen selected short contributions presented at the East European Conference on Advances in Databases and Information Systems ADBIS 2013 September 1-4 Genova Italy and twenty six papers from ADBIS 2013 satellite events. The short contributions from the main conference are collected in the first part of the book which covers a wide range of topics like data management similarity searches spatio temporal and social network data data mining data warehousing and data management on novel architectures such as graphics processing units parallel database management systems cloud and MapReduce environments. In contrast the contributions from the satellite events are organized in five different parts according to their respective ADBIS satellite event: BiDaTA 2013 Special Session on Big Data New Trends and Applications GID 2013 The Second International Workshop on GPUs in Databases OAIS 2013 The Second International Workshop on Ontologies Meet Advanced Information Systems SoBI 2013 The First International Workshop on Social Business Intelligence Integrating Social Content in Decision Making and last but not least the Doctoral Consortium a forum for Ph.D. students. The book which addresses academics and professionals alike provides the readers with a comprehensive and timely overview of new trends in database and information systems research and promotes new ideas and collaborations among the different research communities of the eastern European countries and the rest of the world.

Spatio-Temporal Recommendation in Social Media Hongzhi Yin, Bin Cui, 2016-05-19. This book covers the major fundamentals of and the latest research on next generation spatio temporal recommendation systems in social media. It begins by describing the emerging characteristics of social media in the era of mobile internet and explores the limitations to be found in current recommender techniques. The book subsequently presents a series of latent class user models to simulate users behaviors in decision making processes which effectively overcome the challenges arising from temporal dynamics of users behaviors user interest drift over geographical regions data sparsity and cold start. Based on these well designed user models the book develops effective multi dimensional index structures such as Metric Tree and proposes efficient top k retrieval algorithms to accelerate the process of online recommendation and support real time recommendation. In addition it offers methodologies and techniques for evaluating both the effectiveness and efficiency of spatio temporal recommendation systems in social media. The book will appeal to a broad readership from researchers and developers to undergraduate and graduate students.
