Becoming Bestsellers: John Grisham and Danielle Steel (Sample from Chapter 2 of THE BESTSELLER CODE) Jodie Archer, Matthew L. Jockers, 2016-08-16 This sneak peek teaser featuring literary giants John Grisham and Danielle Steele from Chapter 2 of The Bestseller Code a groundbreaking book about what a computer algorithm can teach us about blockbuster books stories and reading reveals the importance of topic and theme in bestselling fiction according to percentages assigned by what the authors refer to as the bestseller ometer Although 55 000 novels are published every year only about 200 hit the lists a commercial success rate of less than half a percent When the computer was asked to blindly select the most likely bestsellers out of 5 000 books published over the past thirty years based only on theme it discovered two possible candidates The Accident by Danielle Steel and The Associate by John Grisham The computer recognized quantifiable patterns in their seemingly opposite but undeniably successful writing careers with legal thrillers and romance In Chapter 2 Archer and Jockers analyze this data and divulge the most and least likely to best sell topics and themes in fiction with a human discussion of the why behind these results The Bestseller Code is a big idea book about the relationship between creativity and technology At heart it is a celebration of books for readers and writers a compelling investigation into how successful writing works
