Being Interdisciplinary Alan Wilson, 2022-05-03 In Being Interdisciplinary Alan Wilson draws on five decades as a leading figure in urban science to set out a systems approach to interdisciplinarity for those conducting research in this and other fields He argues that most research is interdisciplinary at base and that a systems perspective is particularly appropriate for collaboration because it fosters an outlook that sees

beyond disciplines There is a more subtle thread too A systems approach enables researchers to identify the game changers of the past as a basis for thinking outside convention for learning how to do something new and how to be ambitious in a nutshell how to be creative Ultimately the ideas presented address how to do research Building on this systems focus the book first establishes the basics of interdisciplinarity Then by drawing on the author s experience of doing interdisciplinary research and working from his personal toolkit it offers general principles and a framework from which researchers can build their own interdisciplinary toolkit with elements ranging from explorations of game changers in research to superconcepts In the last section the book tackles questions of managing and organising research from individual to institutional scales Alan Wilson deploys his wide experience researcher in urban science university professor and vice chancellor civil servant and institute director to build the narrative While his experience in urban science provides the illustrations the principles apply across many research fields
