Calculus Refresher A. A. Klaf, 2012-06-08 This book is unique in English as a refresher for engineers technicians and students who either wish to brush up their calculus or find parts of calculus unclear It is not an ordinary textbook It is instead an examination of the most important aspects of integral and differential calculus in terms of the 756 questions most likely to occur to the technical reader It provides a very easily followed presentation and may also be used as either an introductory or supplementary textbook The first part of this book covers simple differential calculus with constants variables functions increments derivatives differentiation logarithms curvature of curves and similar topics The second part covers fundamental ideas of integration inspection substitution transformation reduction areas and volumes mean value successive and partial integration double and triple integration In all cases the author stresses practical aspects rather than theoretical and builds upon such situations as might occur A 50 page section illustrates the application of calculus to specific problems of civil and nautical engineering electricity stress and strain elasticity industrial engineering and similar fields 756 questions answered 566 problems to measure your knowledge and improvement answers 36 pages of useful constants formulae for ready reference Index

Revival: Philosophy and the Physicists (1937) Lizzie Susan Stebbing, 2018-05-08 This book is written by a philosopher for other philosophers and for that section of the reading public who buy in large quantities and no doubt devour with great earnestness the popular books written by scientists for their enlightenment We common readers to adapt a phrase from Samuel Johnson are fitted neither to criticize physical theories nor to decide what precisely are their implications We are dependent upon the scientists for an exposition of those developments which so we find them proclaiming have important and far reaching consequences for philosophy Unfortunately however our popular expositors do not always serve us very well The two who are most widely read in this country are Sir Arthur Eddington and Sir James Jeans They are not always reliable

guides Their influence has been considerable upon the reading public upon theologians and upon preachers they have even misled philosopher who should have known better Accordingly it has seemed to me to be worth while to examine in some detail the philosophical views that they have put forth and to criticize the grounds upon which these views are based
