Afghanistan: Taking Back The Infantry Half-Kilometer Major Thomas P. Ehrhart,2015-11-06 Operations in Afghanistan frequently require United States ground forces to engage and destroy the enemy at ranges beyond 300 meters These operations occur in rugged terrain and in situations where traditional supporting fires are limited due to range or risk of collateral damage With these limitations the infantry in Afghanistan require a precise lethal fire capability that exists only in a properly trained and equipped infantryman While the infantryman is ideally suited for combat in Afghanistan his current weapons doctrine and marksmanship training do not provide a precise lethal fire capability to 500 meters and are therefore inappropriate Comments from returning non commissioned officers and officers reveal that about fifty percent of engagements occur past 300 meters The enemy tactics are to engage United States forces from high ground with medium and heavy weapons often including mortars knowing that we are restricted by our equipment limitations and the inability of our overburdened soldiers to maneuver at elevations exceeding 6000 feet Current equipment training and doctrine are optimized for engagements under 300 meters and on level terrain There are several ways to extend the lethality of the infantry A more effective 5 56 mm bullet can be designed which provides enhanced terminal performance out to 500 meters A better option to increase incapacitation is to adopt a larger caliber cartridge which will function using components of the M16 M4 The 2006 study by the Joint Service Wound Ballistics Integrated Product Team discovered that the ideal caliber seems to be between 6 5 and 7 mm This was also the general conclusion of all military ballistics studies since the end of World War I **18 Bravo Handbook** Christian Hoyt,2021-06-24 The following publication is an almanac of open source references every 18 Bravo ought to be familiar with to ensure mission readiness The information inside this publication was collected from official sources referenced at the forefront of each section and summarized to enhance the reediness of the Bravo in any environment where he may have access to electronic sources This handbook is comprised of easily searchable chapters covering everything from broad range and mission planning to specific weapons troubleshooting in a quick reference format This is a fluid document and in constant development check back frequently for updates **Jane's International Defense Review** ,2008 *Shooter's Bible, 101st Edition* Graham Moore,Jay Cassell,2009-11-03 A firearms reference that includes ballistics charts hundreds of photographs prices and specifications for thousands of guns and pieces of equipment **US Special Ops** Fred Pushies,2016-07 Military author and spec ops expert Fred Pushes profiles weapons missions vehicles and iconic commandos from the eighteenth century to now **Commerce Business Daily** ,1999-10
