**Christian Nationalism, Nation-Building, and the Making of the Holocaust in Slovakia** Hana Kubátová, 2025-02-10 Previous scholarship on fascism in Slovakia has focused on either state actors operating from urban centres or the mechanisms of violence on a grassroots level with the result being that the Holocaust is seen as primarily a top down and state centred process In contrast Hana Kubátová reveals here a dynamic and unexplored centre periphery relationship and how violence against the

Jewish population unfolded in both cities and the countryside and on both national and local levels As an integral component of broader nation building efforts the authority of the fascist regime and the newly founded Slovak state hinged not only on appeasing Hitler but also on civilian populations of the nation's heterogeneous eastern borderlands especially local elites such as priests and teachers as well as the rural masses The book explores how this relationship was forged how it was maintained and how ultimately Christian nationalism operated as a political strategy that brought differently positioned actors together to broker deals over resources and power accrued through the co enactment of genocide by a broad coalition of perpetrators on the ground In so doing this little known chapter of Holocaust history offers a new way to understand the dynamics and escalations of mass violence and how collaborations between elite and popular groups can pave the way for ethnic cleansing across different territories and even times

**Permanent Distortion** Nomi Prins, 2022-10-11. A riveting exposé of a permanent financial dystopia, its causes and real-world consequences. It is abundantly clear that our world is divided into two very different economies. The real one for the average worker is based on productivity and results. It behaves according to traditional rules of money and economics. The other doesn't. It is the product of years of loose money poured by central banks into a system dominated by financial titans. It is powerful enough to send stock markets higher even in the face of a global pandemic and threats of nuclear war. This parting from reality has its roots in an emergency response to the financial crisis of 2008. Quantitative Easing injected a vast amount of cash into the economy, especially if you were a major Wall Street bank. What began as a short-term dependency became a habit, then a compulsion and finally an addiction. Nomi Prins relentlessly exposes a world fractured by policies crafted by the largest financial institutions led by the Federal Reserve that have supercharged the financial system while selling out regular citizens and leading to social and political reckonings. She uncovers a newly polarized world of the mega-rich versus the never-rich, the winners and losers of an unprecedented distortion that can never return to normal.
