process After that the light bulb uses only 50 watts of power What is the Barbecue Smoking or Grilling Yes and no Although the most common usage of the term barbecue describes the backyard grill some people have a different definition of the term Barbecue can be divided into two categories hot and fast and low and slow Grilling generally uses a direct heat that ranges between 300 500 degrees It does a great job on steak chicken chops and fish While the food will cook you must watch it closely to avoid burning It will pick up less smoky flavor Mostly this is a simple and enjoyable way to cook you have plenty of time to hang out with your friends and family during the cookout It is low and slow Indirect heat and temperatures in a smoker typically run between 200 275 If you ve ever been to Kansas City Memphis or Texas you know what I m talking about A slow and low smoked piece of meat can take anywhere from 2 to 15 hours to fully develop its natural flavour When you look into a slow smoked meat pink smoke ring means the meat has been in the smoker for a long time How to Use Wood in BBQ Smokers The essence of good barbecue smoking is wood It s what gives the dish its flavour Wood was once the only fuel available but controlling the temperature and amount of smoke reaching the meat is difficult The majority of people nowadays use charcoal gas pellet or electric smokers The wood is added in chunks pellets or sawdust and it smoulders and produces a nice amount of smoke The most common beginner mistake is oversmoking the meat Beginners should begin with a small amount of wood and work their way up In this cooking guide you will find Easy to follow step by step guide to grilling and smoking delicious meats 50 recipes BUY NOW and let your customer became addicted to this incredible BOOK
