**Handbook of Research on Promoting Sustainable Public Transportation Strategies in
Urban Environments** Yilmaz, Zafer, Golem, Silvia, Costescu, Dorinela, 2023-01-16 The traditional urban transportation
systems around the globe are now being transferred into green public transportation systems in an effort to mitigate CO2
emissions and provide nature friendly transportation systems in cities and ultimately to increase citizens wellbeing
Furthermore the cities are expected to transform their traditional transportation systems to cutting edge high technology
green transportation systems in the near future due to regulations applied by the related authorities such as the EU and UN
At the same time cities are undergoing a transformation from traditional to smart cities which is an inevitable process due to
swift developments in technologies and smart systems Sustainable public transportation systems must be developed and
adjusted to be applicable in future smart cities The Handbook of Research on Promoting Sustainable Public Transportation
Strategies in Urban Environments considers the challenges and advantages of sustainable public transportation systems in
urban areas and provides relevant theoretical frameworks the latest empirical research findings and an overview of the latest
technological developments on the subject Covering key topics such as green vehicles sustainability and walkable cities this
major reference work is ideal for policymakers government officials industry professionals researchers scholars practitioners
