The research papers presented were carefully reviewed and selected from several initial submissions on the topics: the Internet of Things, IoT and its applications such as smart cities, smart devices, agriculture, transportation and logistics, healthcare, etc. The book contains peer-reviewed chapters written by leading international scholars from around the world. This book will appeal to students, practitioners, industry professionals and researchers working in the field of IoT and its integration with other technologies to develop comprehensive solutions to real-life problems.

Global Supply Chains in the Pharmaceutical Industry Nozari, Hamed, Szmelter, Agnieszka, 2018-11-09. In a rapidly growing global economy where there is a constant emergence of new business models and dynamic changes to the business ecosystem, there is a need for the integration of traditional, new and hybrid concepts in the complex structure of supply chain management. Within the fast-paced pharmaceutical industry, product strategy, life cycles and distribution must maintain the highest level of agility. Therefore, organizations need strong supply chain capabilities to profitably compete in the marketplace. Global Supply Chains in the Pharmaceutical Industry provides innovative insights into the efforts needed to build and maintain a strong supply chain network in order to achieve efficient fulfillment of demand, drive outstanding customer value, enhance organizational responsiveness and build network resiliency. This publication is designed for supply chain managers, policymakers, researchers, academicians and students and covers topics centered on economic cycles, sustainable development and new forces in the global economy.

Design, Analysis and Applications of Renewable Energy Systems Ahmad Taher Azar, Nashwa Ahmad Kamal, 2021-09-09. Design Analysis and Applications of Renewable Energy Systems covers recent advancements in the study of renewable energy control systems by bringing together diverse scientific breakthroughs on the modeling, control and optimization of renewable energy systems as conveyed by leading energy systems engineering researchers. The book focuses on present novel solutions for many problems in the field, covering

modeling control theorems and the optimization techniques that will help solve many scientific issues for researchers Multidisciplinary applications are also discussed along with their fundamentals modeling analysis design realization and experimental results This book fills the gaps between different interdisciplinary applications ranging from mathematical concepts modeling and analysis up to the realization and experimental work Presents some of the latest innovative approaches to renewable energy systems from the point of view of dynamic modeling system analysis optimization control and circuit design Focuses on advances related to optimization techniques for renewable energy and forecasting using machine learning methods Includes new circuits and systems helping researchers solve many nonlinear problems

Ubiquitous Positioning Robin Mannings,2008 This groundbreaking resource introduces practitioners to the emerging field of Ubiquitous Positioning positioning systems that identify the location and position of people vehicles and objects in time and space in the digitized networked economy The future and growth of ubiquitous computing will be fueled by the convergence of many other areas of technology from mobile telematics Internet technology and location systems to sensing systems geographic information systems and the semantic web This first of its kind forward looking volume explores ubiquitous computing from a convergence perspective offering a road map to this burgeoning field **The Blink Video**
