EZ Connect Wireless High-Gain Antenna

Wireless High-Gain directional Antennas

The SMC range of high-gain universal, point-to-point and point to multi-point (patent pending) antennas provide the perfect solution for those applications where greater distance or structural penetration is necessary.

The SMCANT-DI105 is a high-gain wide dispersion antenna perfect for wireless LAN solutions or customer premise equipment.

The SMCANT-DI135 is a perfect universal antenna that can be used in a wireless LAN, point-to-point, or customer premise environment. This multi-purpose antenna provides superior structural penetration, point-to-point ranges of up to 10 km, and can act as a general-purpose point-to-point antenna.

The SMCANT-DI145 is the market's premier point-to-point antenna that does not require line-of-sight (LOS). The narrower beam and higher gain provide seamless connectivity up to 14.5km. When greater structural penetration is needed, the DI45 is also the choice for indoor/outdoor wireless build-out applications.

Cables, connectors, weather-proof boxes, mounting brackets, and antenna stands are available for the full line of SMC high-gain antennas. Call your SMC representative for details.
