

SMS Mobile Originated and terminated Call Flow

The diagram below depicts message flow or signals between various network elements when SMS is sent from MS-A to MS-B.

Behind this SMS, there are basic protocols such as SS7(Signaling System No.7) and SMPP(Short Message Peer to Peer Protocol). SS7 supports communication between core network elements. SMPP is used in IP domain. SMPP is responsible for communication between SMS center(SMSC) and ESME(e.g. service provider/content provider).

Following are the steps for entire SMS process from originating mobile(MO) to terminating mobile(MT).

- The SMS-SUBMIT is the MO FSM message(Mobile originating forward short message) which is between origin MSC and origin SMSC.

5G NR Modelling in MATLAB Tulsi Pawan Fowdur, Madhavsingh Indoonundon, Dragorad A. Milovanovic, Zoran S. Bojkovic, 2024-06-30 5G is the fifth generation of wireless technology and NR stands for a new radio interface and radio access technology for cellular networks i.e. a physical connection method for radio based communication. It is a powerful platform that supports a wide range of services that includes enhanced mobile broadband, massive machine type communication, and ultra-reliability and low latency covering several vertical industries such as e-health, transportation, energy, media, and factories automation. This book provides a detailed description of the fundamental aspects of 5G. It gives an in-depth coverage of the network architecture of 5G by considering both the network reference point architecture and the service-based architecture. It also describes all the user and control plane protocols including the standalone and non-standalone architecture options. The radio access technologies such as the waveforms used in 5G, the multi-access and duplexing techniques, as well as the resource allocation schemes, are treated in details. Additionally, the physical layer signal processing blocks of 5G NR are covered in depth with elaborate numerical examples to illustrate the functioning of each block in the 5G downlink transmitter and receiver chain. The main originality of this book is the detailed illustration of the 5G NR pre-processing steps as well as Matlab simulation models with explanation on the codes to allow for a seamless understanding of the principles. In general, this book is meant for anyone with a basic engineering background who would be interested to acquire a solid foundation in the fundamental concepts of 5G NR.

Intelligent Circuits and Systems for SDG 3 - Good Health and well-being Bhaveshkumar Choithram Dharman, Suman Lata Tripathi, 2024-08-05 ICICS is a series of conferences initiated by School of Electronics and Electrical Engineering at Lovely Professional University. Looking at the response to the conference, the bi-annual conference now onwards will be annual. The 5th International Conference on Intelligent Circuits and Systems (ICICS 2023) will be focusing on intelligent circuits and systems for achieving the targets in Sustainable Development Goal SDG 3 identified as Good Health and Wellbeing by United Nations.
